MEMORANDUM

TO: Patrick G. Howard, County Administrator

FROM: David R. Ellspermann, Clerk of the Circuit Court

DATE: December 4, 2008

RE: OPERATING PARTS AND SUPPLIES INVENTORIES-FY 2008

Marion County conducted its annual formal year-end physical inventory of significant operating parts and supplies. The inventories reviewed included fleet repair operating parts and supplies of the Fleet Management Department and the Fire Rescue Services Department, the water and wastewater operating parts and supplies of the Utilities Department, the operating materials and supplies of the Transportation Department and the aviation fuel at the Dunnellon/Marion County Airport. The value of these inventories will be recorded as assets in the County's official financial records at September 30, 2008.

Department management is responsible for the daily control and usage of its inventories. The five departments took appropriate actions to plan and perform the physical counting, pricing and valuation of the respective inventories. We commend each department for their actions and attention to this matter.

The Internal Audit Division has completed its related audit activities. We have concluded that the departmental inventories (see attached) are properly stated in all material respects. Internal Audit performed certain tests and activities to provide the basis for this conclusion.

Internal Audit worked with departmental management during the planning stages of each inventory and was on site to observe most of the physical counts. Such observation included the performance of test counts and other procedures to determine whether counts were accurately taken. In addition, other audit tests were subsequently performed to confirm the accuracy of the inventory valuations and adjustments to perpetual inventory records. To reach our conclusion, we discussed with department personnel the counting procedures and valuation methods of the inventory, which was followed by certain audit tests to confirm the reasonableness of quantities and the accuracy of the respective inventory valuations.

OPERATING PARTS AND SUPPLIES INVENTORIES - FY 2008

These departments will continue to conduct physical inventories at every fiscal year end. Internal Audit will work through County Administration to identify any other department with sufficient operating inventories to be included in the FY 2009 physical inventory.

During our observation and following audit activities of each department, we noted certain issues pertaining to inventory counting procedures and inventory controls. These issues will be reported to department management in separate information memoranda, which may assist in the planning and conduct of next fiscal year's physical inventory .

This review was performed by Wallace Watford, Sachiko Leon and Darla Smith . We would like to express our appreciation to the management and staff of the above departments for their cooperation and assistance in the conduct of our review activities.
