| Interest Income² | 548,887 | 1,861,991 | 84,415 | 623,202 | 399,069 | 218,943 | 76,662 | 3,813,169 |

Notes:

1. Investment balances are reported on market value, not including accrued interest.
2. The balances shown on this page are based on trade settlement date. The balances shown on other pages of this report include forward settling trades (trades that have not settled as of month end but will in the following month(s)); this is to comply with GASB accrual accounting reporting requirements.
3. Investment earnings are reported on total return basis with accrued interest.

| Annual Return | 0.50% | 0.04% | Interest Earnings | Last 12 Months | Since Inception ² |
| Since Inception - March 31, 2004 | 2.27% | 1.88% | Pooled Operating Portfolio | \$ 2,176,721.58 | \$39,395,636.61 |
| Return in Dollars over the Benchmark ¹ | Last 12 Months | Since Inception ² | Standard & Poor's Credit Ratings | Last 12 Months | Since Inception ² |
| Pooled Operating Fund | \$567,027.57 | \$6,930,679.37 | Pooled Operating Portfolio | AA+ | AA+ |

Notes:

1. Based on market value as of September 30, 2018.
2. Pooled Operating Portfolio inception date April 2004.

Tab II

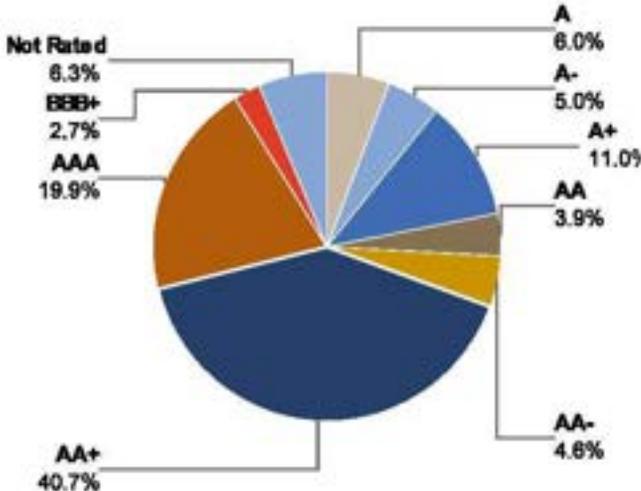

- The Pooled Operating Portfolio is of high credit quality and invested in U.S. Treasury, federal Agency/GSE, federal agency/MBS, federal agency/CMO, asset-backed, supranational, corporate, and municipal securities.
- The Portfolio's annual total return performance of 0.50%, outperformed the benchmark's performance of 0.04% by 0.46%. Since inception, the Portfolio earned 2.27%, versus 1.88% annualized for the benchmark.
- We positioned portfolios with a defensive duration posture for the majority of the past two quarters in light of the Fed's impact on short-term rates. This has benefited portfolio returns as yields across the curve approached new highs for this cycle. Economic Conditions were characterized by:
 - The yield on the 2-year Treasury note rising by 29 basis points to end the quarter at 2.82%,
 - A robust labor market, with the U.S. unemployment rate near 48 year lows,
 - Core inflation near the Fed's 2% target, while oil prices surged and wages trended higher,
 - Consumer confidence is at a near two-decade high, while measures of manufacturing activity are also very strong,
 - As well as, an escalating trade war with China, weakness in emerging market economies and currencies, and political uncertainty.
- While the Fed's policy actions will depend on future economic data, we believe the current strength of the U.S. economy, coupled with a strong labor market and rising inflation, will cause the Fed to continue raising rates at a pace of about one ¼ percent hike per quarter well into 2019. Therefore, we plan to maintain a defensive duration posture to mitigate a portion of interest rate risk relative to benchmarks.

| End of month trade-date amortized cost of portfolio holdings, including accrued interest. | | | | |

IMPORTANT DISCLOSURES

This material is based on information obtained from sources generally believed to be reliable and available to the public; however, PFM Asset Management LLC cannot guarantee its accuracy, completeness or suitability. This material is for general information purposes only and is not intended to provide specific advice or a specific recommendation. All statements as to what will or may happen under certain circumstances are based on assumptions, some, but not all of which, are noted in the presentation. Assumptions may or may not be proven correct as actual events occur, and results may depend on events outside of your or our control. Changes in assumptions may have a material effect on results. Past performance does not necessarily reflect and is not a guaranty of future results. The information contained in this presentation is not an offer to purchase or sell any securities.

- Market values that include accrued interest are derived from closing bid prices as of the last business day of the month as supplied by Interactive Data, Bloomberg, or Telerate. Where prices are not available from generally recognized sources, the securities are priced using a yield based matrix system to arrive at an estimated market value.
- In accordance with generally accepted accounting principles, information is presented on a trade date basis; forward settling purchases are included in the monthly balances, and forward settling sales are excluded.
- Performance is presented in accordance with the CFA Institute's Global Investment Performance Standards (GIPS). Unless otherwise noted, performance is shown gross of fees. Quarterly returns are presented on an unannualized basis. Returns for periods greater than one year are presented on an annualized basis. Past performance is not indicative of future returns.
- Bank of America/Merrill Lynch Indices provided by Bloomberg Financial Markets.
- Money market fund/cash balances are included in performance and duration computations.
- Standard & Poor's is the source of the credit ratings. Distribution of credit rating is exclusive of money market fund/LGIP holdings.
- Callable securities in the portfolio are included in the maturity distribution analysis to their stated maturity date, although, they may be called prior to maturity.
- MBS maturities are represented by expected average life.

GLOSSARY

- **ACCRUED INTEREST:** Interest that is due on a bond or other fixed income security since the last interest payment was made.
- **AGENCIES:** Federal agency securities and/or Government-sponsored enterprises.
- **AMORTIZED COST:** The original cost of the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discount or premium with respect to short-term securities (those with less than one year to maturity at time of issuance) is amortized on a straight line basis. Such discount or premium with respect to longer-term securities is amortized using the constant yield basis.
- **BANKERS' ACCEPTANCE:** A draft or bill of exchange accepted by a bank or trust company. The accepting institution guarantees payment of the bill as well as the insurer.
- **COMMERCIAL PAPER:** An unsecured obligation issued by a corporation or bank to finance its short-term credit needs, such as accounts receivable and inventory.
- **CONTRIBUTION TO DURATION:** Represents each sector or maturity range's relative contribution to the overall duration of the portfolio measured as a percentage weighting. Since duration is a key measure of interest rate sensitivity, the contribution to duration measures the relative amount or contribution of that sector or maturity range to the total rate sensitivity of the portfolio.
- **DURATION TO WORST:** A measure of the sensitivity of a security's price to a change in interest rates, stated in years, computed from cash flows to the maturity date or to the put date, whichever results in the highest yield to the investor.
- **EFFECTIVE DURATION:** A measure of the sensitivity of a security's price to a change in interest rates, stated in years.
- **EFFECTIVE YIELD:** The total yield an investor receives in relation to the nominal yield or coupon of a bond. Effective yield takes into account the power of compounding on investment returns, while nominal yield does not.
- **FDIC:** Federal Deposit Insurance Corporation. A federal agency that insures bank deposits to a specified amount.
- **INTEREST RATE:** Interest per year divided by principal amount and expressed as a percentage.
- **MARKET VALUE:** The value that would be received or paid for an investment in an orderly transaction between market participants at the measurement date.
- **MATURITY:** The date upon which the principal or stated value of an investment becomes due and payable.
- **NEGOTIABLE CERTIFICATES OF DEPOSIT:** A CD with a very large denomination, usually \$1 million or more, that can be traded in secondary markets.
- **PAR VALUE:** The nominal dollar face amount of a security.

GLOSSARY

- **PASS THROUGH SECURITY:** A security representing pooled debt obligations that passes income from debtors to its shareholders. The most common type is the mortgage-backed security.
- **REPURCHASE AGREEMENTS:** A holder of securities sells these securities to an investor with an agreement to repurchase them at a fixed price on a fixed date.
- **SETTLE DATE:** The date on which the transaction is settled and monies/securities are exchanged. If the settle date of the transaction (i.e., coupon payments and maturity proceeds) occurs on a non-business day, the funds are exchanged on the next business day.
- **TRADE DATE:** The date on which the transaction occurred; however, the final consummation of the security transaction and payment has not yet taken place.
- **UNSETTLED TRADE:** A trade which has been executed; however, the final consummation of the security transaction and payment has not yet taken place.
- **U.S. TREASURY:** The department of the U.S. government that issues Treasury securities.
- **YIELD:** The rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
- **YTM AT COST:** The yield to maturity at cost is the expected rate of return based on the original cost, the annual interest receipts, maturity value, and the time period from purchase date to maturity, stated as a percentage on an annualized basis.
- **YTM AT MARKET:** The yield to maturity at market is the rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
