Marion County Board of County Commissioners
601 SE 25th Avenue
Ocala, Florida 34471

Dear Commissioners,

Provided herein, is the Proposed Capital Improvement Program for fiscal years 2023/24 – 2027/28. This document serves to provide the Board of County Commissioners with an overview of funding for the Capital Improvement needs of the County over the next five fiscal years. This document does not address the County's Transportation Improvement Program which is adopted separately. The Capital Improvement Program serves only as a capital outlay funding plan and does not represent an official appropriation of County funds. Official appropriations for capital projects are dependent upon their inclusion in the current and future annual budgets of the county as adopted through the statutorily required annual budget process.

For the five fiscal years 2023/24 – 2027/28 the Capital Improvement Program is proposed in the total amount of \$280,507,414. This total includes projects covering a broad range of purposes and funding sources. In addition to \$30,962,639 appropriated for General Capital Improvement projects, the Capital Improvement Program includes total project amounts of \$91,835,130 for Utilities, \$65,624,716 for Transportation Projects, \$20,460,000 for Solid Waste, \$18,021,485 for Sheriff, \$16,706,290 for Airport, \$16,459,417 for Fire Rescue and EMS, \$10,799,384 for Parks and Recreation and \$9,638,353 for Animal Services.

The Capital Improvement Program includes \$94,063,410 for capital projects utilizing a portion of the proceeds of the 1% Local Option Infrastructure Sales Surtax levied in calendar years 2017 through 2020 and 2021 through 2024 as approved by public referendum.

A general revenue appropriation of \$4,666,660 for fiscal year 2023/24 is funded in the County's proposed fiscal year 2023-24 budget. Other countywide projects in the amount of \$39,044,742 for future years 2024/25 and beyond are included in the Capital Improvement Program and are currently designated as "Operating Revenue". These projects will remain under consideration for funding as future annual budgets are proposed and subsequently adopted.

We would be pleased to answer any questions concerning the Capital Improvement Program or provide further information as needed.

Respectfully submitted,

GREGORY C. HARRELL
Clerk of Court and Comptroller
Marion County, Florida

Capital Improvement Program Project Detail

**Marion County Board of County Commissioners
Capital Improvement Program - Fiscal Years 2024 - 2028
Project Detail**

Project: ASC000001 Title: New Animal Center Construction
 Department: Animal Services

Project Description

The needs of the Animal Services department have outgrown the current facilities capacity to provide healthy and sustainable living conditions for the animals being housed for adoption. The transition to a no-kill shelter created additional challenges with having the needed isolation and treatment areas for longer term care without expanding the current facility. The 30 plus year old facility was not designed to address the new mission and due to site limitations, growth at the current location is very challenging. Marion County has procured a new site that has the ability to construct new modern structures designed to meet the needs of the animals and staff, while providing better conditions to promote adoption and quality of life.

Project: ASC000002
Department: Animal Services

Title: Kennel Door Install And Floor Seal

Project Description

This project is for the replacement of 196 kennel gates in Animal Services. Animal Services was recently awarded a grant that will replace 62 gates and CIP funding is needed to replace the remaining 134 gates. These gates will provide a safe and aesthetic barrier for the animals and are rugged, easier to clean and designed for longevity. The gates also offer a visual barrier between kennels which will help lower the noise level as the animals will not be able to see each other and therefore are less likely to bark. In addition, the kennels, walkways and breezeways will be power washed and sealed, which will mitigate slip hazards for citizens and employees. The projected cost of \$250,000 will include both the materials and labor to install the gates as well as power wash, prep and apply two (2) coats of sealant throughout.

Project: BDC202001

Title: Growth Services Training Room Remodel

Department: Building Department

Project Description

This project is to remodel the training room located in the Growth Services Building. The training room will be brought up to modern standards to allow professional presentations as well as several advisory board meetings to be successfully conducted. Items in this project include building an ADA accessible stage, adding acoustical panels and ceiling tiles, new flooring, painting and upgrading the HVAC system to help reduce the humidity.

Project: FHC000004

Title: Health Dept Replace Heating Boilers

Department: Facilities Management

Project Description

The Florida Department of Health is a public entity that works to promote and improve the health of the people in the community by providing programs and services such as dental, immunizations, counseling, COVID-19 testing, and many other services. To maintain the integrity of the building operation, Facilities Management has recognized the need for the scheduled replacement of two water heaters that serve the building's heating and air conditioning system. The units are over 20 years old and past their useful life expectancy. The planned replacement of these heaters will reduce the possibility of an emergency due to the loss of heating capacity.

Project: FLC000001

Title: Consolidated Fleet Facility

Department: Fleet Management

Project Description

This will be a new facility for Fleet Management. The new shop will be a single building encompassing all 4 shops to include our Fleet Administration Office and parts room. The new building will be 82,000 square feet with our administration office in the front, with 32 bays and a centralized parts room. Fleet Management is in need due to the age and size of our current facility. As our fleet grows and the demand of our citizens increase, Fleet Management is required to keep up with our service needs of all of our vehicles and equipment. This will also include our Fire Fleet, which continues to grow every year. Fleet Management has outgrown their current facility.

Project: FMC000002 Title: Energy Management Control
 Department: Facilities Management

Project Description

This project includes the purchase and installation of an updated energy management system (EMS) that will serve the Sheriff's Special Operations building and the Florida Department of Health buildings. Both of these locations are currently equipped with an outdated Staefa control system. These outdated systems are obsolete and are difficult to obtain replacement parts. The EMS system provides control of the heating, ventilation, and air conditioning system and fundamental information to perform real-time system controls to efficiently operate the building. These systems will be updated to Computrol, a modern EMS platform.

Title: Commissioners Auditorium Remodel

Department: Facilities Management

Project Description

This project includes modifications to the Marion County Board of County Commissioners Auditorium. This auditorium holds the Marion County Board of County Commissioners board meetings, workshops, and public hearings. The auditorium is also used for public meetings, the value adjustment board hearings, planning and zoning advisory board hearings as well as miscellaneous training. This project will include acoustic treatment, lighting modification, furniture re-design, and HVAC system replacement. The HVAC updates will assist in better air quality and circulation within the audience section of the auditorium. The lighting and acoustic treatments will result in an improved indoor environment for the citizens during events held in the auditorium.

Title: JC Judges Parking Lot Security

Department: Facilities Management

Project Description

The Judicial Center requires additional security to the judges' parking lot for safe ingress and egress of the building. Security measures may include the addition of structures to obstruct views from surrounding buildings to the parking lot. This location was reviewed by multiple professionals. The project will follow the recommendations of the assessments.

Title: Security Upgrades Countywide Buildings

Department: Facilities Management

Project Description

This project will upgrade the security level of various county-owned buildings that are at medium to high risk or have high public traffic. This project will be a furtherance of the 2020 efforts to enhance the checkpoint security of Marion County Judicial Center and the Administration building. Based on individual site requirements, the enhancements will include, but are not limited to, upgrades such as hardening of walls and glass, dedicated checkpoints, building access control, confidentiality sound control, and surveillance systems.

Title: Jail Replace Staefa with Computrol

Department: Facilities Management

Project Description

During a property condition assessment done by Partner Engineering in August 2020, it was identified that the Landis & Staefa building automation system was obsolete with parts no longer available for the system. Furthermore, it was found that there are high costs incurred through outside vendors as Facilities personnel are not able to make changes to the system in-house. An additional on-site automation system, the ICE, is in good condition, but the system is proprietary. Based on the current condition and the estimated remaining useful life of the two (2) systems, it was recommended to combine these systems into a new system using non-proprietary platform.

Title: Jail Replacement of 7 Rooftop AC Units

Department: Facilities Management

Project Description

This project will replace approximately seven (7) A/C units at the jail that have been identified by a 2020 Property Condition Assessment as nearing their useful life expectancy. The report indicates that the units are currently 11-15 years old and should be replaced before failure. The units are located in pods A-F that house the juvenile inmates. These are the remaining pods that were not completed in FY 2021.

Title: Jail Clean AC Ductwork in Pods

Department: Facilities Management

Project Description

During a property condition assessment done by Partner Engineering in August 2020, it was identified that the ductwork located in pods A-D were in need of cleaning. This air duct system is the conduit where air goes in and out of the building through the HVAC system. This plays a big part in air quality and safety as the system is responsible for removing dirt and debris from pods A-D.

Title: Jail Replace Solar Panels

Department: Facilities Management

Project Description

This project is to extend the life of the solar hot water heating array, located at the Marion County Jail. The 100-panel solar hot water system is located near the B Pod and was installed circa 2010 using federal grant funds. These panels preheat the cold water before it enters the hot water heaters, creating a significant reduction of the required energy to supply hot water to the jail. This project is to replace approximately 34 damaged or deteriorating hot water solar panels as well as the damaged insulation.

Title: Clerk IT Closet

Department: Facilities Management

Project Description

At the October 20, 2020 BCC meeting, the Clerk of Circuit Court and Comptroller requested to use \$360,000 from prior year funds to construct and remodel the Clerk IT building switch closets. The existing closets are full and separate closets are needed for IT and Facilities. This separation will improve security of the IT switch closet. This separation will also provide MCC IT the opportunity to continue to improve their Disaster Recovery (DR) response, improve the cabling between switches and floors to increase redundancy and improve overall infrastructure by having an additional firewall with increased remote-site work availability. Space for the IT equipment was identified by using a portion of the ladies' restrooms on each floor, next to the existing switch closets.

Title: JC3 Third Floor Buildout

Department: Facilities Management

Project Description

This project is designed to provide funding to complete the third-floor interior construction in the judicial center (JC3.) The JC3 expansion was constructed in 2008, with the third and fourth floor shelled out for future use. The fourth floor is scheduled to be constructed in 2022 to provide an additional high-capacity courtroom and additional workspace for the State Attorney. The third floor has approximately 30,000 square feet of useable work space to help optimize Marion County work space or building optimization. A possibility for this buildout included relocating Clerk Annex employees and other agencies requiring a high-security atmosphere and centralized locations. This project would support vacating other county-owned buildings for additional strategic and growth options.

Project: FMC000045 Title: Health Dept Back-Up Chiller Replace
 Department: Facilities Management

Project Description

The scope of this project includes the removal and replacement of an existing 120-ton Trane chiller at the Marion County Health Department. This work is inclusive of all electrical, piping, labor, insulating and controls. This project is deemed an emergency. This facility is a critical emergency response location for all of Marion County and as such requires the ability to operate during any natural or manmade emergency situation. There are two chillers for this building with one being a backup in the event of a system failure. The current backup chiller is not capable of operating at full capacity and repairs are near the cost of replacement. This chiller is over 15 years old and is at the end of its normal life cycle.

Title: 4H Farm Septic to Sewer

Department: Facilities Management

Project Description

Marion County Facilities Management is entering into a memorandum of understanding with Marion County Utilities regarding the 4-H Farm Septic to Sewer conversion. Marion County Utilities applied for and was awarded a grant from St. Johns River Water Management District for a 50% matching grant up to \$130,000. While Utilities will lead the efforts for design, permitting and construction of the project, Facilities will provide the 50% match of \$65,000 plus any additional fees above the \$130,000. At this time and based upon Utilities estimated schedule of fees, the cost of the project will be around \$178,016.78. The purpose of this project is for the 4H farm to cease the use of a septic system and instead connect to the public wastewater system. After completion of the project, Facilities Management will maintain the lines until the point of connection at which point it will become the responsibility of Marion County Utilities.

Project: FMC000047 Title: Medical Examiner Generator Replacement
 Department: Facilities Management

Project Description

Marion county is responsible for the maintenance and operational support of the Leesburg Medical Examiner building. The Medical Examiner’s Office is a critical part of law enforcement and community health functions. This requires the building to be functional during all major events (weather, health, natural disasters, etc.). The current generator is non-functioning and unrepairable due to age and condition. There is a rental unit in place now, however the cost of renting the temporary unit is highly expensive and will quickly approach the purchase price of a replacement unit. This project is for a complete replacement of the generator unit to include removal of the non-functioning unit and installation of a new unit inclusive of a transfer switch, feeder wire, emergency stop button and remediation to the concrete slab.

Project: FMC000048 Title: McPherson NW Parking Expansion
 Department: Facilities Management

Project Description

The Northwest corner of the McPherson complex is currently occupied by the main Information Technology building, Parks and Recreation, the State Representative offices, and the U.S. Congress offices. There are currently 51 employees that report to these buildings daily, with only 40 parking spaces, inclusive of handicap-dedicated areas. It is requested that 17 additional parking spaces be provided, for a total of 57 spaces, to accommodate the 51 employees, respective visitors, and the fluctuation in staffing.

Project Detail**

Project: FMC000050 Title: SOE Traffic and Parking Efficiency
 Department: Facilities Management

Project Description

This project will redirect the flow of traffic around the Supervisor of Election’s building and add additional parking spaces for greater efficiency and safety for citizens. Currently, there is not enough parking to accommodate the number of citizens that utilize this location at various times. During early voting and for all poll worker classes, citizens and volunteers are forced to park in the small parking lot in front of the building, along the right of way of NE 16th Street, and in the parking lots of surrounding businesses. This causes pedestrians to interact with vehicular traffic both on the street and with commercial traffic from adjacent businesses. The project will provide a new one-way traffic pattern around the West and North side of the building with additional paved parking along the property’s boundary and will then exit to NE 10th Avenue. It will also include the relocation of two drainage retention areas as required by the location of the new roadway.

Project: FRC000007 Title: Fire EMS Ocala Central
 Department: Fire Rescue Services

Project Description

Marion County Fire Rescue (MCFR) is planning to build a new main Emergency Medical System (EMS) station at a new site and vacating the current station. The current building, a former Juvenile Detention facility, is at maximum capacity for housing EMS and supervisory crews and additional expansion is not possible. It is an old building with several challenges and was never designed or intended for this use. The new building will allow MCFR to continue to provide EMS services to the City of Ocala, surrounding County areas, and the two main hospitals in the area. The new building will also allow for expansion as the need for service grows.

Title: Fire Station 2 Rebuild

Department: Fire Rescue Services

Project Description

This project demolishes the existing Fire Station with the anticipation of rebuilding a new 10,000 sq/ft (est.) fire station on the property. This design will be using a modified Marion County's prototype. The project will replace the existing aged-structure with a modern building that follows the current building codes and construction methods to meet the needs of our citizens and first responders.

Project: FRC000016 Title: Fire Station HVAC Replacement
 Department: Fire Rescue Services

Project Description

This project will address indoor air quality concerns in fire stations that have increased its occupancy level outside of the original building design criteria. The current structure, occupants, and the future needs of the building will be assessed, then a custom solution will be developed to ensure the structure will operate within proper air quality parameters in the future. Coordination with Fire will identify the highest priority for this FY.

Project: ITC000002 Title: Kronos Time Keeping System
 Department: Information Technology

Project Description

Marion County BCC will be assuming the Kronos Workforce Central responsibilities originally held by the Clerk. All County departments will be transitioning to utilize Kronos as their time keeping system. This project will require server hardware and software, 45 replacement time clocks, 6 additional time clocks, an additional Kronos license, support services and professional services.

Title: Server Room Expansion and Upgrade

Department: Information Technology

Project Description

This project is to modify the current main Information Technology building. The project will include the expansion or remodeling of the current space to account for planned growth and efficient operations of the IT personnel. The project will also either relocate the main IT server room to the expanded building envelope or enhance the current location to be more robust in order to resist disturbance or damage to the equipment during inclement weather.

Project: ITC000004 Title: Cybersecurity Upgrades
 Department: Information Technology

Project Description

Cybersecurity is a constant evolution of technologies and methods to protect computer networks, systems, and data against sophisticated cyber threats. Security experts predict that in 2021 there will be a cyber-attack incident every 11 seconds. Information Technology continually evaluates developing industry trends and technologies to provide the best line of defense for our employees and citizens. The following initiatives are identified to provide the greatest security enhancements for the organization: Advanced Endpoint Protection with Artificial Intelligence (AI), Multi-Factor Authentication, Password Management Solution, Privileged Access Management, cutting-edge (2021) firewall technology, Web Application Filtering (WAF), Security Event and Incident Management (SEIM), and Identity Service Engine (ISE).

Project: LBC375013 Title: Freedom Public Library Expansion
 Department: Public Library System

Project Description

The expansion of the Freedom Public Library will enable to library system to better meet the informational, educational and entertainment needs of the ever expanding population in the SR200 corridor. By dividing the project funding into first the design phase and next the construction phase, it will allow the library to apply for up to \$500,000 in state construction grant funds. The existing library was designed and constructed with storefront windows on two sides to more easily expand in two directions. Some renovation will be needed to the existing facility which opened in 2000. Off-site water retention will enable maximum utilization of the site.

Title: SELP Wash Rack

Department: Southeast Livestock Pavilion

Project Description

This project is for the design, demolition and construction for the current wash rack area of the Southeastern Livestock Pavilion barn area. The current wash rack area has multiple issues, causing flooding and run off during events. The facility has developed a short term fix for the issue but is in need for construction of a new concrete wash rack that can handle the high usage with rails.

Title: SELP Auditorium AV Upgrade

Department: Southeast Livestock Pavilion

Project Description

Replace and upgrade the A/V equipment in the auditorium. The SELP Auditorium is used for concerts, guest speakers, weddings, meetings, receptions, and other special events. The aged AV system will be upgraded to enhance the functionality and performance, providing an improved experience for the audience. The SELP Auditorium was assessed in 2019 by a professional acoustics consultant. The recommended updates to this location will provide enhanced amplified sound to each divided space with separate media content.

Project: LPC202003 Title: SELP Sales Arena Remodel
 Department: Southeast Livestock Pavilion

Project Description

The ceiling in the sales arena needs to be raised to allow better sound quality and reduce moisture. Facilities suggested leaving the ceiling open rather than replacing ceiling tiles. The restrooms are not ADA-compliant and need to be completely remodeled. It has been discussed to combine the restrooms on each side to create one men’s restroom and one women’s restroom for more space to become compliant. This project will raise the ceiling, improve the sound quality, upgrade the sound system, and construct two ADA-compliant restrooms.

Project: LPC202004 Title: SELP Campground
 Department: Southeast Livestock Pavilion

Project Description

Design and construction of a campground at the Southeastern Livestock Pavilion. The campground was previously designed as the part of the phase 3 expansion project for the SELP in 2018. The engineering firm will update the existing plans to current standards and codes. The campground will consist of paved, full hook up campsites to the north east of the SELP property next to the back arena. Another project addition will be the new entrance road off of Jacksonville Rd to the SELP facility.

Project: LPC202102 Title: SELP Announcers Tower and Office
 Department: Southeast Livestock Pavilion

Project Description

The current announcers tower and event office has several major facility issues that after Facilities review of the project it is encouraged and cost effective to build a new tower. The current announcers tower does not provide a secure or proper climate control environment necessary for the A/V equipment in the office. The flooring in the tower is becoming a danger due to age. The walls in the tower and event office have extensive water damage. The new tower will be a block building 550 sq. ft.

Project: LPC202104 Title: SELP Gate 2 Entrance Enhancement
 Department: Southeast Livestock Pavilion

Project Description

This is a multi-phase project which includes changing the main entrance driveway to the facility and aligning the entrance for easier trailer access. This project will also create a new entrance gate that will be an aesthetic addition for the entry to the facility. The chain link fencing will be removed and replaced with new decorative security fencing. Phases of this project include two phases. Design, engineering and permitting is expected to cost \$20,000 and construction is expected to cost \$380,000. This project will improve the safety and security for visitors at this facility. This includes foot traffic, guests arriving and leaving the Livestock Pavilion for an event and event staff/participants who are often pulling large trailers. This project will also decrease water runoff into the Extension Office Parking Area. Additionally, this project improves the overall functionality and aesthetic for guests and event holders alike, therefore improving the overall customer experience.

Project: LPC202201 Title: Recreation Hall Remodel
 Department: Southeast Livestock Pavilion

Project Description

This project will include the conversion of the Recreation Hall at the Southeastern Livestock Pavilion into offices and storage. Improvements will include a medium to large conference room, two smaller offices and a cleaning supply room. Additionally, the existing restroom in the Recreation Hall will be remodeled to bring it current with current ADA compliance standards. This project will improve functionality and efficiency of staff at the facility by moving all offices into one central location. This project will also create a restroom designated for staff use, rather than sharing a restroom associated with a rental space.

Project: LPC202301

Title: SELP Dave Baillie Arena Grandstands

Department: Southeast Livestock Pavilion

Project Description

The Dave Baillie Arena Grandstands, located at the South Eastern Livestock Pavilion, are over 20 years old and have been subjected to heavy use over the years. The covered arena is booked approximately 48 weeks out of the year with over 300,000 people attending these events. Certain events have as many as 7,500 people in the stands per day. Safety concerns include some areas of the stands being warped, worn, and unstable. Furthermore, the upper levels are enclosed by chain link fencing that is secured to the stands with metal wire. While some repairs were done to the stands in May of 2022, it has been recommended that replacement of the stands is necessary to prevent any future safety issues.

Title: SELP Arenas Sound Upgrade

Department: Southeast Livestock Pavilion

Project Description

The Southeastern Livestock Pavilion (SELP) can serve as many as 7,500 people per day for field events, exhibitions, receptions, and other happenings. Providing rental services and with a public announcement system in every covered area, clear audio that can be zoned to specific or all areas is necessary as well as a means to lock the system. While the original system has been repaired various times over the last 20 years, the audio continues to have feedback issues and cannot be heard throughout the entire facility. This project will review the need and upgrade all components to achieve optimal audio throughout.

Title: Design and Construct 20 T-Hangars

Project Description

Design and construction of twenty (20) T-Hangars at the Marion County Airport. The new T-Hangars will replace the previous plan to construct quad boxes at the airport. T-Hangars are a high demand for new tenants at the airport since all hangars are at 100% occupancy. The new T-Hangars will be on an annual lease agreement and will increase the lease revenues and fuel sales at the airport.

Title: Fuel Farm Replacement

Project Description

Plan, design and replace the existing fuel farm to improve the level of service. The new fuel farm will consist of adding two (2) 12,000 gallon fuel tanks; one (1) AvGas and one (1) JetA. The current system is over 20 years old and constantly has mechanical and technical issues that require reoccurring maintenance expense. The new system will improve customer service experience and reduce maintenance expense.

Title: T-Hangar Construction

Project Description

This project is a multi-phase project consisting of the construction of 20 T-Hangar rental units. The completion of this project will increase the airport's economic impact for Marion County. Additionally, increasing the number of T-Hangars will meet the demand for quality multi-purpose, specialized facilities from both local and traveling customers. The design, engineering and permitting are planned to take place in FY24 while the construction is planned to take place in FY25.

Title: Airport Beacon and Power Vault

Project Description

This project will be completed in two phases. Phase 1 (FY23) will include the design of a new rotating beacon with a new L-802A high-intensity rotating beacon, which has two 250-watt pulse smart metal halide lams. The new installation will include new power cable conduit, grounding/counterpoise, and a photocell activation switch. The project will also include the design a new prefabricated electrical vault to house the sensitive and expensive electrical components necessary for controlling the airfield lighting and signage. Phase 2 (FY24) will include the construction of the Airport Beacon and Power Vault. The new power vault will supply the necessary power to the parallel taxiway which significantly increase safety for pilots by mitigating mid-air collisions. The new beacon will bolster safety by increasing night-time visibility and enhance airfield operations during inclement weather.

Project: MAC202202
Department: Airport

Title: Airport Parallel Taxiway for Runway

Project Description

This project is part of the airport master plan and includes both state and federal grant match funding. Phase 1 (FY23) will consist of the design of a full-length parallel taxiway (5,000'x35') to the primary runway 5-23, including the necessary holding bays for aircraft run-up. The project will also include LED taxiway lights, LED position and directional signs and a new L-828 regulator. The necessary marking and drainage will also be designed. This project will be designed to meet the current design aircraft consistent with the airport master plan. Phase 2 (FY25) of this project will include the taxiway for runways 5-23 and 10-28. This project will directly enhance safety and capacity at the airport by limiting inadvertent access and back taxi activity on the active runways. Full parallel taxiways are also recommended as a standard airport design element by the FAA and are a recognized airport layout to pilots.

Department: Airport

Title: Airport Runway Rehab 5/23

Project Description

Plan, design, and resurface runway 5/23 in accordance with FAA regulations and local code. This is a 5000' x 100' paved and lighted runway with both PAPI (Precision Approach Path Indicators) and an instrument approach for landing with visual restrictions or obstructions. The Airport is adding infrastructure to support the demand for the forecasted aviation growth in the County's transportation system. The Marion County Airport primary runway (5/23) surface has exceeded its projected life expectancy and requires resurfacing. Airport surfaces are graded annually by state aviation inspectors; FDOT has designated runway 5/23 as in need of repair.

Title: Airport Weather Station

Project Description

An aviation weather system would provide real-time weather details to pilots to assist in their flight planning including landing, takeoff, and enroute weather concerns. Critical information that would convey includes wins (direction, speed & gusts), temp, dew point, altimeter, cloud ceilings, precipitation as well as forecasted weather. This station would also provide weather information to the general population and be instrumental during weather-related natural disasters.

Title: Backup EOC

Project Description

Creation of a backup disaster recovery (DR) site to use as a backup (or in addition) to the current Emergency Operations Center (EOC). The backup DR is designed to provide continuation of essential services during an emergency event. The backup EOC will work in tandem with, or in place of, the existing EOC serving as both contingency and redundancy option.

Title: Work Station Replacement

Project Description

Replace the existing console workstations and computers in the Public Safety Communication's Center (PSC). Due to the rigors of a perpetual operation 24 hours a day, 7 days a week, 365 days a year, existing essential equipment was out of warranty and sustained unending wear and tear. This ensures that the Department can provide continuous service to the community.

Title: 800 MHz System Infrastructure Upgrade

Project Description

The 800Mhz Radio system was constructed in 2005 and is currently transmitting data via predominately T-1 circuit connections, which at the time was the high capacity system. With the addition of several tower sites and increasing use of bandwidth, this older technology is no longer able to maintain the data transmission capacity needed and prevents expansion of the system. Further, the operational cost of the T-1 circuitry continues to increase, as fewer companies offer this, or maintain the lines and T-1 can be unstable under certain conditions. This project will allow the Marion County Radio System to upgrade to an Ether-net and fiber based data transmission system, enhancing the stability and capacity of the radio system.

Title: Tower Expansion

Project Description

Public Safety Communications in partnership with Motorola Solutions, Inc. (“Motorola Solutions”) is proposing a modification of the existing radios system. Leveraging the County’s historical investment in its Project 25 (P25) public safety radio system, the proposed solution will increase the coverage performance of the emergency communications network to provide 95% on-the-street coverage for portable and mobile radios, as well as improved in-building coverage. The expansion of the existing radio system is a critical step that will allow the existing network to grow in tandem with Marion County’s community and to continue to provide a high level of service for all system users. Additionally, the improved radio system coverage will dramatically impact all public safety operations conducted by Marion County Fire Rescue, the Marion County Sheriff’s Office, and Dunnellon Police Department, Belleview Police Department. The solution proposed for the ASTRO 25 Radio System Coverage Expansion includes the following elements:– New Simulcast Remote Site and Tower for the Marion Oaks area– New Simulcast Remote Site and Tower for the Sparr area– New Simulcast Remote Site leveraging as existing tower for the Salt Springs area– Upgrade of the existing Dunnellon Water Tower to Simulcast operation

Project: PDC000001 Title: Public Defender Building Expansion
 Department: Facilities Management

Project Description

The Public Defender has requested an expansion proposal in our yearly Capital Improvement Program since roughly 2008, based on county-funded personnel projection study performed in 2007. In our FY15-16 request, we revised our estimated growth. It is anticipated that over the next three (3) years our Marion County location could increase by fifteen (15) employees. Our current location is unable to absorb this growth, requiring an increase of space. One option to accommodate our anticipated growth would be to add an additional 10,000 square feet to our current Public Defender building located at 204 NW 3rd Avenue in Ocala, FL. The current Public Defender building is 13,000 square feet, with the requested addition bringing it to 23,000 square feet.

Project: PRC202001 Title: Salt Springs Civic Park Restroom
 Department: Parks and Recreation

Project Description

The Salt Springs Civic Park restroom improvement is the construction of a new park standard two-hole ADA restroom at the park. This restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. Facilities management department involvement will include overseeing the construction of a 350+/- sf restroom facility. The restroom facility will be located near the playground and basketball courts. A Feasibility study was done in FY 2022. Architectural and engineering is slated for FY 2023 with anticipated construction in FY 2024.

Project: PRC202002 Title: Gores Landing Improvements
Department: Parks and Recreation

Project Description

This is a master plan project that will be completed in two phases. Phase 1 will include the design, engineering, permitting, and removal of existing structures and new construction. Phase 2 will include the removal of existing restrooms; construction of ADA-accessible restrooms that includes showers, mirrors, and hot water; replace existing antiquated wastewater system; replace existing boat ramp with single lane ramp; rework boat channel; establish designated trailer parking with ADA access; construct ADA lateral fishing platform; establish designated campsites with amenities and ADA access; pave interior drive, handicap parking, and sidewalks; install bear-proof trash cans; and establish designated host camper site. This project will significantly increase safety for park guests utilizing the boat ramp, improve the functionality of the boat ramp, address ADA accessibility, and enhance the overall guest experience. Additionally, this project will enhance environmental safety by modernizing the wastewater treatment system. Gores Landing is a resource-based park providing opportunities for camping and aquatic recreation. This project consists of a four-hole with showers park standard restroom facility, a two-stall parking lot, ADA compliant ramp, and a new advanced treatment sewage system at the park. The restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. Facilities management department involvement will include overseeing the construction of a 800+/- sf restroom facility. The Feasibility study was completed in FY 2022. The restroom facility will be located near the existing pedestrian parking lot. Architectural and engineering is slated for FY 2026 with anticipated construction in FY 2027.

Project: PRC202003 Title: North Shop Extension
 Department: Parks and Recreation

Project Description

Improvements are needed to the central shop facilities located at Wrigley Fields. Improvements include extending the existing shop to allow for more equipment storage and protection from the weather. This improvement will prolong the life of the equipment. This shop is used by multiple divisions and the additional space is greatly needed.

Title: Central Shop Extension and Restroom

Department: Parks and Recreation

Project Description

Improvements are needed to the central shop facilities located at McPherson Complex. Improvements include extending the existing shop to allow for more equipment storage and protection from the weather. This improvement will prolong the life of the equipment. The facility currently does not have a restroom and the staff have to go to another department to use their facilities. Construction of a shop restroom is a need and will improve staff morale.

Project: PRC202005 Title: Belleview Sportsplex Phase I
 Department: Parks and Recreation

Project Description

The Belleview Sportsplex park improvement will be a multi-phase project. Phase 1 was a master plan for the entire Sportsplex, which will be completed in FY 2023. Phase 2 consists of the demolition and construction of (5) baseball fields and (2) tee ball fields and the construction of a community park on 17 Ac which is owned by the City of Belleview. The community park will consist of a parking lot, playground, basketball and volleyball courts, and walking trails. Facilities management department involvement will include overseeing the construction of (1) 4,400 +/- sf two-story concession/ restroom facility. The restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. The concession buildings are located in the center of one baseball quad. This project will drastically enhance the overall guest experience and address current safety concerns at this facility by improving playing conditions and the parking areas. This project will also improve functionality and guest experience at the concession stand, office, scorekeeper, and spectator areas. Removal of the trailer at this facility will enhance aesthetics and improve overall operations at this facility.

Project: PRC202007 Title: Baseline Road Trailhead Improvements
 Department: Parks and Recreation

Project Description

Design and permit the installation of a new playground, fall zone, and shade structures; remove old playground elements, fall zone material, and border to install new play structures, border, fall zone material, and shade structures. The existing playground unit has two distinct units that address a variety of age groups. These units have had several critical failures and the current condition is worsening. This is due to the age, amount of use, and being exposed to the elements. The current safety surfacing is poured in place and has exceeded its expected life, per industry standards and may no longer meet standard F2223, the standard for surfacing. The addition of shade structures of varies sizes located over specific playground components will reduce the temperature and will also increase the life expectancy of the overall unit itself.

Project: PRC202008 Title: Westbrook Park Improvements
 Department: Parks and Recreation

Project Description

Norm Westbrook Park is a resource-based park providing opportunities for equine use and walking trails. This project consists of a multiphase approach over the next 3 years. Phase 1 was completed in FY 2022. Phase 2 will include a playground, pavilion, multi-purpose field, and a park standard restroom. The restroom facility is a new park standard two-hole ADA restroom at the park. The restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. Facilities management department involvement will include overseeing the construction of a 350+/- sf restroom facility. The restroom facility will be located near the existing pedestrian parking lot. Architectural and engineering is slated for FY 2024 with an anticipated construction in FY 2025.

Title: Ocala Park Estates Improvements

Department: Parks and Recreation

Project Description

Ocala Park Estates improvements will consist of the design and construction of a parking lot with 1 ADA and 3-4 regular parking stalls and an ADA sidewalk to allow access to all amenities. Additional improvements include the preservation of natural space with the addition of a non-paved walking trail, installation of a 2-12 year old playground, and construction of a 20 X 20 picnic pavilion with a grill. These improvements will add to the vision of the park and improve the quality of life of the community.

Project: PRC202201 Title: Rotary Field Improvements
 Department: Parks and Recreation

Project Description

The Rotary Sportsplex has become one of the Marion County’s most in-demand athletic facilities. As such, the quality of the fields and health of the turf have been put under considerable strain and it has become increasingly difficult to maintain the fields at a premier level. This project will improve the quality of playable areas in the facility as well as the aesthetic people have come to expect from this facility. The recreational leagues that call this park home will benefit from renovated athletic fields. Additionally, improved athletic fields are an incentive for tournaments to bring their business to Marion County. The current upper soccer fields at Rotary will be stripped and the surface grade will be brought up to level. Installation of sports turf will be added to the fields. Along with irrigation improvements, new bleachers and sports lighting.

Project: PRC202202 Title: Reddick Playground
 Department: Parks and Recreation

Project Description

The town of Reddick is an underserved area of Marion County that currently has very limited options for outdoor recreation. The Parks & Recreation department will design and install a new playground to provide much needed recreation space in the community. This project will be designed in-house by the department's design staff. Additional benefits of a new playground installation will include an open space for passive recreation and will provide an open outdoor space for improving physical fitness, overall wellbeing and relieving stress. Park improvements include new playground, bathrooms, walking trail, open space and parking improvements.

Title: Land Acquisition Southwest Region

Department: Parks and Recreation

Project Description

The Parks & Recreation Department currently is in need to purchase land for future park development. The Department has identified the southwest region as an area of need of a future park. The current parks in the area cannot serve the rising population. The Department will review and select multiple locations to review before finalizing any decisions with BCC.

Project: RBC000002 Title: MC Employee Health Clinic
 Department: HR-Risk and Benefit Services

Project Description

The purpose of this project is to build an on-site employee health clinic that would expand the services currently offered to employees, resulting in a greater level of care than what is currently available with our limited space and resources. With the potential to combine with the current occupational clinic, employees would have better access to convenient, high-quality care which would increase productivity, reduce absenteeism, improve retention, and have the potential to prevent and identify illness in earlier stages. Further aspects of the clinic have the potential to include an on-site pharmacy, mental health services, and diagnostic care. Studies have shown not only this increase in employee satisfaction and health but an increase in savings to the County as employees utilize the clinic in place of external services.

Title: State Attorney's Office Expansion and Courtrooms

Department: Facilities Management

Project Description

This project includes the construction of new office space and courtroom on the vacant 4th floor of the Judicial Center. Nearly 25,000 square feet of shelled space is available for construction. The State Attorney's Office has reached its capacity on the fifth floor of the judicial center. The SAO is requesting to expand part of the fourth floor to accommodate their needs. This project will also create a new modern courtroom on the fourth floor that will accommodate a full jury.

Project: SMC0001MA

Title: Timucuan Road and Lake Weir Culvert Improvements

Department: Office of the County Engineer

Project Description

This project is located on SE Timucuan Rd between the Bird Island and Wallace E Johnson Jr subdivisions. A concrete bridge was originally in place to travel between Bird Island and the Mainland. The bridge was replaced with a causeway and triple culverts for safe travel in 1979. The culverts were replaced and lengthened in 2003. Due to low water levels in lake Weir, the water is no longer flowing through the culverts. As a result, a portion of lake Weir has become isolated from the main lake and the insufficient flow exchange to the area has created unfavorable conditions leading to potential eutrophication. The current design being considered involves a transfer pump which will restore flow exchange and reduce existing stagnant conditions.

Project: SMC0002DR Title: Country Gardens Stormwater Retrofit CP 59
 Department: Office of the County Engineer

Project Description

The scope of this retrofit project consists of stabilizing the eroding banks of an existing retention pond, constructing a dry treatment pond, and improving a portion of the surrounding conveyance system. Historically, this area has experienced road and property flooding, the swale network is substandard, and little to no treatment is provided to a retention area that has an existing sinkhole.

Project: SMC0002FL Title: Stanton Weirsdale Drainage Project
 Department: Office of the County Engineer

Project Description

The project is located in the Gerald's Survey Subdivision located south of SE HWY 42 and west of SE 134th Avenue Road. This project will be partially funded from a Community Development Block Grant (CDBG) to improve the internal road system to MSTU's Citizen Standards, provide a sidewalk along SE 157th Lane from SE 134th Avenue Road to the school, address water quality and drainage from SE 134th Avenue Road, clarify the right-of-way provided by the Marion County School Board, and address existing drainage issues in the area. The lion's share of the project funding will be from a CDBG grant totaling \$800,000. OCE/Stormwater budget funding will cover the balance of the project's cost which includes: Testing (design), survey, design, ROW/easement acquisition, permitting fees, certifications, construction, testing (construction), and all project completion and closure requirements.

Project: SMC0003FL Title: SW 27th Ave Flood Relief
 Department: Office of the County Engineer

Project Description

SW 27th Avenue is a county-maintained road located south of Ocala and serves as a major north-south corridor on the south side of the County. The road has historically flooded during significant storm events, such as Hurricanes Frances and Jeanne in 2014 and Hurricane Irma in 2017, and remained impassable for extended periods of time (three weeks for Irma). This project proposes to design and construct a semi-permanent pumping station that can serve to mitigate flooding issues in times of heavy rainfall with the long-term view that the roadway will need more extensive reconstruction in the future to deal with the larger drainage issues.

Project: SMC0003WQ

Title: RS 5th Replat Innovative Stormwater
Retrofit CP 74

Department: Office of the County Engineer

Project Description

The Rainbow Springs 5th Replat Stormwater Retrofit (CP 74) project is located in southwestern Marion County within the Rainbow Springs Priority Focus Area and surface watershed. Dry retention ponds provide minimal removal of nitrogen from stormwater runoff as it is being infiltrated. Infiltrated stormwater is a source of nitrogen, in the form of nitrate, to Rainbow Springs. A Total Maximum Daily Load (TMDL) for nitrate concentration has been adopted for Rainbow Springs and a basin management action plan (BMAP) has been developed. This project will improve the ability of the existing retention ponds to remove nitrogen from the stormwater entering the pond. This is accomplished by removing approximately two feet of soil from the pond bottoms and replacing it with the Bold and Gold soil amendment. The project will retrofit four DRAs, 2160, 2169, 2171, and 2210, with Bold and Gold soil amendment to improve water quality of stormwater runoff.

Project: SMC0004FL

Title: SW 52nd St Flood Relief HMGP

Department: Office of the County Engineer

Project Description

The County desires to mitigate flooding along SW 52nd Street, just west of Country Road 475, and provide flood relief to not only the road but also surrounding subdivisions during the 100-year storm event. There are no constructed drainage retention areas (DRAs) in the area. During Hurricane Irma on September 10th, SW 52nd Street flooded and remained impassable for several weeks. Anticipated improvements to the Stormwater Management System include new drainage retention areas (DRAs), associated stormwater conveyance infrastructure, and an elevated roadway. The project will provide flood relief for SW 52nd Street, subdivisions: Lemonwood II Phase 7, Deerwood Phase 2 and Luttrell, O.R. Shackleford Land, as well as, S Magnolia Avenue (aka CR 475). The County has secured grant funding from FEMA for the design phase of the project. FEMA grant funding is anticipated for land acquisition and construction, but is not guaranteed at this time.

Title: NW 115th Ct Flood Relief

Department: Office of the County Engineer

Project Description

Fairfield Oaks was originally platted in 1971 before stormwater rules were in place in Florida and do not have adequate drainage facilities. The existing drainage retention area does not have enough capacity to address the known flooding in the area. During Hurricane Irma, five (5) homes flooded. The subdivision has flooded historically including in the years 2002 and 2017 (Hurricane Irma). This project serves to study whether there is any feasible, cost-effective solution to mitigate flooding issues.

Project: SMC0005WQ Title: SSS Units 29 and 30 Innovative Stormwater Retrofit

Department: Office of the County Engineer

Project Description

Silver Springs Shores Units 29 & 30 Innovative Stormwater Retrofit of DRAs 7322 and 7403 CP 80 - This project is located in the Silver Springs Shores Unit 29 & 30 subdivisions. The project will retrofit the bottoms of two drainage retention areas (DRAs 7403 & 7322) with a Bold and Gold (B&G) soil amendment to improve water quality of stormwater runoff prior to reaching the aquifer through infiltration within the DRA. The project is located within the Silver Springs Priority Focus Area. Dry retention ponds provide minimal removal of nitrogen from stormwater runoff as it is being infiltrated. Infiltrated stormwater is a source of nitrogen, in the form of nitrate, to Silver Springs. A Total Maximum Daily Load (TMDL) for nitrate concentration has been adopted for Silver Springs and a basin management action plan (BMAP) has been developed. This project will improve the ability of the existing retention ponds to remove nitrogen from the stormwater entering the pond. This is accomplished by removing approximately two feet of soil from the pond bottoms and replacing it with the Bold and Gold soil amendment. The project will retrofit two DRAs with Bold and Gold soil amendment to improve water quality of stormwater runoff prior to reaching the aquifer through infiltration within the DRA. This water quality retrofit is necessary in order to maintain compliance with the BMAP.

Title: Country Gardens Flood Relief HMGP

Department: Office of the County Engineer

Project Description

The County desires to mitigate flooding along SE 34th Place within the Country Gardens subdivision and provide flood relief to not only the road but also the surrounding residences during the 100-year storm event. Country Gardens is a County-maintained subdivision which has historically flooded during years 1998, 2004 (Hurricanes Frances & Jeanne), 2012 (TS Debby), and 2017 (Hurricane Irma). Three homes were directly affected by the flooding. Anticipated improvements to the Stormwater Management System include new drainage retention areas (DRAs), expansion of proposed (previously designed) DRA, associated stormwater conveyance infrastructure, and an elevated roadway. The County has secured grant funding from FEMA for the design phase of the project. FEMA grant funding is anticipated for land acquisition and construction, but is not guaranteed at this time.

Project: SMC0007FL Title: SE 64th Ave Rd Drainage Improvement
 Department: Office of the County Engineer

Project Description

This project is located off of SE 64th Avenue Rd, north of Hemlock Terrace Pass, and south of Hemlock Terrace Way. The project consists of purchasing a parcel for access as well as a portion of an additional parcel for the construction of a drainage retention area. There have been several resident complaints of flooding in the area. The construction of a new drainage retention area will help to alleviate flooding within this part of Silver Springs Shores. The project is within the Silver Springs Priority Focus Area.

Project: SMC0007WQ Title: Marion Oaks Bioswales
 Department: Office of the County Engineer

Project Description

This project is within the Rainbow Springs BMAP area as well as the contributing area to Wilson Head, Citrus Blue, and Gum Springs which has a finalized TMDL as of October 2019. The project was identified from the Gum Swamp & Big Jones Creek WMP, completed in 2012. This project is comprised of three project areas with a combined 192-acre contributing area, with mostly medium-density residential land uses. Stormwater in these three areas is primarily conveyed by swales which drain to DRAs. DRAs and swale systems provide minimal removal of nitrogen and phosphorus from stormwater runoff as it is being infiltrated. Infiltrated stormwater is a source of nitrogen, in the form of nitrate, to Rainbow Springs as well as Wilson Head Springs, Citrus Blue Springs, and Gum Springs. This project will improve the ability of the existing swales to remove nitrogen from the stormwater entering the conveyance system. Based on the Gum Swamp & Big Jones Creek WMP – BMP Analysis, the recommended BMP is to enhance the swale system, rather than the DRAs, due to the fact that most of the stormwater percolation within these drainage basins occurs within the swale system, never reaching the receiving DRAs. This project will enhance the current swale system by retrofitting specific portions of the conveyance system within the drainage basins to promote denitrification of stormwater that percolates in the swales. The retrofit will include regrading the swales and installing a 12-inch layer of Bold and Gold below the swale bottom. This distributed stormwater treatment approach has the advantage of being able to reduce nutrient loads through percolation in the swales for all storm events, including those that would not result in runoff reaching the receiving DRAs.

Project: SMC0008WQ

Title: NW 44th Ave Innovative Stormwater Retrofit

Department: Office of the County Engineer

Project Description

The NW 44th Avenue Innovative Stormwater Retrofit project is within the Rainbow Springs BMAP area. The project was identified from the West Ocala WMP, completed in 2014. A 62.84-acre contributing area, comprised of farmland (37.84 acres), roadway and industrial land uses (25 acres), drains to an existing dry retention pond with a 2.5-acre pond bottom. Dry retention ponds provide minimal removal of nitrogen and phosphorus from stormwater runoff as it is being infiltrated. Infiltrated stormwater is a source of nitrogen, in the form of nitrate, to Rainbow Springs. A TMDL for nitrate concentration has been adopted for Rainbow Springs and a BMAP has been developed. This project will improve the ability of the existing retention pond to remove nitrogen from the stormwater entering the pond. This is accomplished by removing approximately two feet of soil from a portion of the pond bottom and replacing it with the Bold and Gold soil amendment. Bold and Gold is manufactured to contain no organics and removes dissolved nutrients from the stormwater that infiltrates the media. The proposed project is a continuation of a phased implementation of Bold and Gold retrofits to County owned retention ponds in the BMAP areas. To optimize the cost-benefit of the project, the County will install Bold and Gold within a portion of the pond bottom to treat the stormwater runoff from the roadway and industrial area which has the highest nitrogen loads within the catchment area. This treatment cell will be designed to hold an optimum capacity of approximately 0.32 inches of runoff depth over the entire catchment area (62.84 acres). The optimum Bold and Gold cell area will be approximately 0.85 acres.

Title: MCSO Evidence Forensics Building

Department: Facilities Management

Project Description

This project includes the construction of a new 35,000 square-foot forensic building that will house the evidence and forensics units for the Marion County Sheriff's Office (MCSO). The unit will provide a DNA screening lab, a latent examination unit, and a property and disposal unit which will be used to store evidence used during court meetings. The new building is necessary due to the increase in criminal cases, the need for additional secure storage space of evidence, and to keep up with the technological advances of forensic investigations.

Project: SOC000009 Title: MCSO Demo Pave Old Evidence Building
 Department: Facilities Management

Project Description

This project includes the demolition and removal of temporary trailers that are used for offices. These trailers are at the end of life while having aged HVAC's, aged structure, warped floors, etc. Following completion of the forensics building, most of the offices will be relocated to this new building. This area will be repurposed into a parking lot for detectives and office staff.

Title: MCSO Jail Plumbing A Through C Pods

Department: Facilities Management

Project Description

The first construction phase of the Marion County Jail was in 1983 when POD's A through D were constructed. This phase of construction is now 38 years old and the original cast-iron piping has deteriorated to the point of failure. This project will replace the failing, above ground, vertical cast-iron with PVC piping that will last at least 30 additional years.

Title: MCSO Martel Ph 1 Gun Range

Department: Facilities Management

Project Description

The Sheriff's Office utilizes a shared gun range which has caused frequent scheduling conflicts and short notice cancellations of mandatory firearms training. This has caused staff to either miss a training opportunity or reschedule for another day. A new gun range on existing county-owned property will allow for continued training opportunities without conflict. In addition, this will allow for there to be expanded training opportunities to improve emergency response to a variety of situations such as an active school shooting scenario.

Title: MCSO Jail Replace Booking Cabinets

Department: Facilities Management

Project Description

This project will replace wooden cabinets in the Booking and Medical Sections of the County Jail. The existing cabinetry has been damaged beyond repair by termites. The new cabinets will be of plastic composite material to prevent future damage.

Project Funding and Costs

| Funding Source(s) By Fund and Object | Appropriated To Date | FY 2024 | FY 2025 | FY 2026 | FY 2027 | FY 2028 | Total |

Project: SOC000023

Title: MCSO Jail Boiler

Department: Facilities Management

Project Description

The current boilers in the third phase of construction at the jail are over fourteen (14) years of age and the manufacturer can no longer provide parts to maintain them. These boilers provide heat for the building during the cold months of the year. This project is to replace the failing boilers with new models that will have warranty periods and parts support for the next 15 years.

Project: SOC000024 Title: MCSO LED Dimmable Lights A Through F Pod

Department: Facilities Management

Project Description

This project will replace fluorescent lighting with dimmable LED lights in Pods A-F at the County Jail. This will provide a more secure environment by allowing the deputies to control the amount of lighting in the pod both at night. Dimming the lights at night is safer for the officers than it is to turn the lights completely off. It is also a valuable tool during times of unrest. Studies have shown that dimming the lights can help calm inmates. The LED lights will also reduce the amount of maintenance intervals as the lights have a longer life span.

Project: SOC000027 Title: MCSO Jail E Through F Pod Window Sink
 Department: Facilities Management

Project Description

The jail has had three periods of construction 1983, 1991, and 2006. The second phase of construction is now 30 years old. The POD's are built as dorm style sections with common bathroom areas in each section. The partitions between the wash sinks are constructed of concrete and steel tubing. The steel has become rusted and deteriorated to the point that the tubing has broken off at the top of the concrete. This project is to remove the old mirrors and tubing and replace it with stainless steel material to better withstand the water and other environmental challenges.

Project Funding and Costs

Title: MCSO Emergency Management Warehouse

Department: Facilities Management

Project Description

This project is to allow for the construction of a pre-engineered steel building for storage of Emergency Management equipment. Currently, EOC storage is spread over multiple locations and inside semi trailers. Accessing equipment for emergency deployment is inefficient and slows the response process. Storage, inventory, and maintenance of items and equipment are stretched as well. EOC frequently is looking for new storage space for equipment and response supplies.

Title: MCSO Forest District New Office

Department: Facilities Management

Project Description

After the Sheriff's review of demographics, population growth, and requests for services, it has been determined that a new district office needs to be constructed in the National Forest to better serve the growing community with increased staff. The current office is one of the oldest Sheriff district office's. The layout is inefficient and too small for continued operation. A larger office is needed which will provide a more efficient layout, evidence submission area, and suspect interview room, in order to meet the needs of the expanding community.

Project: SOC000050

Title: MCSO Northwest District New Office

Department: Facilities Management

Project Description

After the Sheriff's review of demographics, population growth, and utilization of services, it has been requested that a new district office be constructed in NW Marion County. This district office would serve Reddick, Blitchton and Morriston communities. Furthermore, this office would aid in the expanding equine tourism community since the opening of the World Equestrian Center, the popular Horse Shows in the Sun (HITS), as well as the expanding adult communities on HWY 27. These communities are currently serviced from the North Multi District (NMD) Office along with another district's communities. Placing the deputies and support staff directly in the communities they serve will aid in public service. This will also allow the NMD the room needed for staff as the need has increased since its original opening.

Project: SOC000051

Title: MCSO Jail Kitchen and Laundry Building Expansion

Department: Facilities Management

Project Description

Additional capacity requirements are anticipated for the Marion County Jail. When the inmate population is increased, additional food and laundry services would be required to also increase to meet the requirements for the inmates. The current Kitchen/Laundry building could be expanded to serve an inmate population over 3,076, thus allowing capacity to construct future Pods to support the future inmate population. Partner Engineering and Science, Inc provided a feasibility of expansion and a proposed site plan in the 2022 strategic planning study. The anticipated cost to expand the Kitchen/Laundry building is \$4,500,000.

Project: SOC000052 Title: MCSO Hangar Renovation
 Department: Facilities Management

Project Description

The current hangar at the Ocala International Airport was first built in 1981. The current size and layout are insufficient for the maintenance and storage of the aircraft and proper office space for the staff. The remodel and expansion of the current aviation hangar will account for new, larger aircraft and additional crew members. This project will provide a dedicated maintenance and repair space and optimized flight planning and training spaces for crew members. Depending on site limitations, the estimated expansion is around 4,500 sq. ft.

Project: STC0732SG Title: Fire Safety Gear Infrastructure Surtax
 Department: Fire Rescue Services

Project Description

This allows for Marion County Fire Rescue to purchase self contained breathing apparatus (SCBA) equipment, which is worn by firefighters to provide breathable air in an atmosphere that is immediately dangerous to life or health. These air packs require a mounting frame, a high pressure tank (4500psi), regulator and a facepiece (mask). These air cylinders are made of aluminum, steel or a composite construction and have the shortest lifespan.

Project: STC073888

Title: NW 44th Ave Infrastructure Surtax

Department: Office of the County Engineer

Project Description

NW 44th Avenue is a transportation capacity project. This project will add two lanes to the existing roadway from NW 60th Street, to 0.2 miles north of NW 73rd Place, an approximate distance of 1.02 miles. The project will provide much needed traffic capacity for this rapidly developing area, and harmonize the roadway with the existing four lane section to the south, which will provide a continuous four lane roadway between US 27 and Hwy 326.

Title: Baseline Landfill New Recycling Center

Project Description

The project is for the design and construction of a new Recycling Center at the Baseline Landfill and well as remediation of the settlement of the existing scale house. The project will consist of 3 phases. Phase 1 improvements shall consist of modifying the existing scale bypass road and the existing scale exit lanes. The Phase 2 improvements shall include modifying the existing scale entrance lanes to add a second in-bound scale and constructing a temporary scale facility so that the scale house settlement remediation can be completed . The Phase 3 improvements shall include constructing a new recycling center facility Southwest of the existing scale building at the Baseline Landfill.

Project Description

For the past few years, the elevator in the Utilities Administration Building has been problematic. It has been out of service occasionally due to requiring a number of repairs, which are not evident during the monthly inspections. This is a potential safety issue should the elevator fail while occupied. This project will replace the elevator in the Utilities Administration Building.

Project: UTC000052 Title: Replacement Sign for Utilities
 Department: Utilities Management

Project Description

The purpose of this project is to replace the large sign by the entrance to the Utilities parking lot. The current sign is old and falling apart. We plan to dismantle the current sign and replace it with a digital sign that will not only be used to identify the Utilities office but also to duplicate billboards for advertising and messaging about water conservation, springs conservation, etc. The goal is to allow the Public Information Office to also utilize messaging ability.

Project: UTC000053 Title: Utilities PLC Replacements
 Department: Utilities Management

Project Description

The Programmable Logic Controllers (PLC) control the operations of the wastewater plants. Currently, the PLC units are obsolete as they were installed when the plants were built. Just as with other technology, these PLC's have reached their life expectancy and tend to lose support. In addition to maintaining the current level of support, these are required to keep the plant operational. These units need to be replaced in order for Marion County Utilities to continue to provide the level of service necessary for the citizens serviced by them. This project will replace the PLC units at Oak Run and Stonecrest wastewater treatment plants and ensure this service level is reached.

Project: UTC000055 Title: SR200 Force Main Replacement
 Department: Utilities Management

Project Description

The DIP Force main along State Road 200 has reached the age life expectancy for the material. If left in service, the chance for a major line break would increase drastically, which would affect many citizens and customers. This project will allow replacing approximately 4,200 feet of 8-inch force main to prevent such a line break.

Title: Marion Oaks Blvd Lift Station and Force Main

Department: Utilities Management

Project Description

The Marion Oaks 22 Master Lift Station has aged to the point where it will need major rehabilitation. The funding for this project will allow Marion County to not only rehabilitate the lift station but to expand it to support future growth. Additionally, this rehab effort will require a 12-force main to be relocated.

Project: UTC000094 Title: Water Mains and Hydrants
 Department: Utilities Management

Project Description

Every year, Water Mains and Valves, Fire Hydrants, service lines, and other utilities infrastructure are added to meet the county's growth and service goals. Over the past few years, this equated to approximately 11 miles of water lines. This project is to ensure that funds are available to meet the current needs and future growth of Marion County.

Project: UTC000101

Title: SW Wastewater Treatment Plant

Department: Utilities Management

Project Description

The current facilities in Marion Oaks and Oak Run are approaching capacity. Due to growth in the Southwest portion of the County, there may be a need to expand the current one or more wastewater treatment plants or construct a new one. This project is to allow for analysis of the current plants to determine their ability to handle the projected growth. Should the analysis determine that a new plant needs to be built, this project will allow for the design and construction of this plant.

Project: UTC000114 Title: Relocations Due to Construction
 Department: Utilities Management

Project Description

This project includes required design changes necessitated by DOT roadway improvements for relocating water and sewer lines. The project utilizes transmission components or utility capital charge fees. The project also includes relocations of water and sewer lines due to other non-DOT reasons, such as when the Office of the County Engineer redesigns a road requiring utility infrastructure to be moved. This project will ensure funds are available for these required projects.

Project: UTC000117 Title: Automated Meter Reading
 Department: Utilities Management

Project Description

Assess county meters to determine which ones need to be replaced with automatic meter reading equipment. Annually, replace those meters in order of need based upon available funding. As new utility systems are added, exchange meters where necessary to match current operating procedures and to work with Marion County Utilities meter reading equipment.

Project: UTC000120 Title: Automated Meter Replacement
 Department: Utilities Management

Project Description

Automated Meter Reading (AMR) meters are mechanical and will wear out with age. AWWA recommends that AMR meters be replaced every 5 years. This project will assess county meters to determine which automated meters need to be replaced with new equipment. Annually, replace at least 10% of meters 5 years or older as recommended by AWWA. We will replace meters less than 5 years old if the assessment indicates the meter is not going to last the full 5 years. Replacements are to be made as long as funding is available in a given year.

Project: UTC000133 Title: Westside Lower Floridian Well
 Department: Utilities Management

Project Description

The St. Johns River Water Management District has identified over-reliance on the Upper Floridian Aquifer (UFA) for water supplies. Developing alternative water supplies such as the Lower Floridian Aquifer (LFA) is important to reducing impacts on the environment and ensuring sustainable management of water resources. This will be Marion County's first Lower Floridian Well on the west side of the county.

Project: UTC000144 Title: Toilet Rebate Minor Capital Replacement
 Department: Utilities Management

Project Description

This project includes utilizing funds available through grants via the SJRWMD to replace toilets throughout the county. The project allows for small scale water conservation efforts through these purchases. The project will offset the withdrawal of groundwater and delay the need for alternative sources of water.

Project: UTC000152 Title: Irish Acres and Kunal Interconnect
 Department: Utilities Management

Project Description

Marion County has identified the need to connect water lines between Irish Acres subdivision and Kunal. This is a strategic move to connect the SR 441 and SR 326 area, which will eventually allow the County to interconnect all services. This long term project will ensure citizens have access to water services, and more easily allow Marion County to switch routes in the case of power outages or other damages to infrastructure.

Project: UTC000153 Title: Marion Oaks Fire Flow Improvements
 Department: Utilities Management

Project Description

This project is a continuation of the program to implement water main extensions recommended in our Marion Oaks PWS masterplan. This program is to improve and provide Fire Flow in the Marion Oaks neighborhood. This program improves fire flow by closing loops within the system and additionally providing water service to the adjacent parcels.

Title: NW Regional WWTF

Department: Utilities Management

Project Description

Marion County has planned for the expansion of our Utility system, serving the Northwest Regional Area (Golden Ocala Area). The Northwest Regional Wastewater Treatment Facility (NWR WWTF) has been designed for future growth with initial construction of a .800 Million Gallons Day, MGD plant. The plant is designed with future expansion capabilities with minimal construction to 1.00 MGD and easily increased to 1.5 MGD. The facility will utilize an advanced treatment process to achieve the nutrient reduction to meet goals established through the Marion County Springs Protection ordinance and the Florida Department of Environmental Protection Basin Action Management Plan.

Title: Rainbow Springs Sewer Feasibility Study

Department: Utilities Management

Project Description

Sewer feasibility study to evaluate the viability of constructing a regional WWTP within the Rainbow Springs region and provide sewer service to the identified sewer sectors removing septic tanks, account for future growth and build-out of the area. Develop Master Plan, revenue sufficiency analysis and rate study to determine a sewer rate structure for the region.

Project: UTC000188 Title: Oak Bend Water Quality Improvements Ph 1
 Department: Utilities Management

Project Description

This project includes the design and construction of a sanitary sewer conveyance system. This project includes construction of a Jack and Bore 24-inch casing under I-75 and construction of approximately 8,000 LF or 8" transmission main. The project will connect the Eastern portion of Oak Bend/I-75 to the Marion County central wastewater collection system. This project will remove from service two package plants.

Project: UTC000200 Title: Don Garlits Septic to Sewer
 Department: Utilities Management

Project Description

Through a grant from the Florida Department of Environmental Protection, Marion County Utilites will be converting the Septic system at the Don Garlits Museum to sewer. This grant will allow the county to abandon the current septic tank. Additionally, it will connect two existing commercial buildings to the sewer system.

Title: Marion County 4-H Farm Septic to Sewer

Department: Utilities Management

Project Description

Through a Grant agreement with Florida Department of Environmental Protection, Marion County will convert the Marion County 4-H Farm from Septic to Sewer. Through the grant, Marion County Utilities will abandon the current two (2) septic tanks. Additionally, Marion County Utilities will connect the 4-H Farm to sewer, installing approximately 1400 linear feet of force main and two pump stations.

Project: UTC000202 Title: Irish Acres to Silver Springs Regional Interconnect
 Department: Utilities Management

Project Description

The purpose of this project is to interconnect the Irish Acres and East Side Consolidated public water systems. The interconnect will enable Marion County Utilities to shift/offset up to 250,000 gallons per day of groundwater withdrawal to Irish Acres, which is located further away from Silver Springs. The water main alignment was chosen to provide service to likely future developments.

Project: UTC000203 Title: Upper Lower Floridian Well Utopia
 Department: Utilities Management

Project Description

The St. Johns River Water Management District has identified over reliance on the Upper Floridian Aquifer (UFA) for water supplies. Developing alternative water supplies such as the Lower Floridian Aquifer (LFA) is important to reducing impacts on the environment and ensuring sustainable management of water resources. This will be Marion County Utilities' first well drilled into the LFA.

Title: Water Line Extension Grant Program

Department: Utilities Management

Project Description

To better serve unincorporated Marion County with Potable Water Service, Marion County proposes to develop a program that would provide a mechanism for potential customers, who meet defined criteria outlined in the program, the ability to submit applications for shared costs associated with water line extensions. Additionally, the extensions could provide central water service to benefitting lots along the pipeline area, supporting more controlled use of the groundwater by a central water source. These short water line extensions would generally consist of, but not be limited to, designing the water line extensions, designing future stub-outs that support the future extensions outside the established boundary of the individual project, installing the required water system infrastructure and connecting the existing system(s), installing fire hydrants to provide fire flow within the area(s), permitting, utility coordination, roadway reconstruction and restoration.

Project: UTCEXT002 Title: Marion Oaks Water Line Extensions
 Department: Utilities Management

Project Description

To better service an area with higher density in the southwest portion of Marion County in a development that offers a legacy of incomplete water infrastructure, Marion County proposes to complete the required interconnects by extending the water mains in the area. These should provide increased hydraulics and will improve the fire flow in the area. Additional scope will analyze the existing water system, design for fire flow, identifying needed water interconnects, designing the interconnects, designing the future stub-outs that support the future extensions outside the established boundary, installing the required water system infrastructure within the boundary and connecting to the existing systems, permitting, utility coordination, roadway reconstruction and restoration.

Project: UTCEXT003 Title: SW 60th Ave Water Sewer Extension
 Department: Utilities Management

Project Description

This project will extend both central water and wastewater service to the facility located at 5664 SW 60th Avenue, Ocala, FLA (The Centers). The project will include a lift station that will service The Centers and the region, a new force main which will connect to the County's existing collection system in and around the State Road 200 corridor, the decommissioning and demolishing of existing private wastewater and water treatment plants, connections of existing water and wastewater systems to the new systems, and other services required to service The Centers. The project will also include, but not be limited to, hydraulic modeling of the water and wastewater systems for the new connections, designing for fire flow, and available capacity in the region, size future and existing water interconnects, lift station design and locations, and determination of needed easements or land acquisitions.

Project: UTCEXT004 Title: SSS Water Sewer Extensions Master
 Department: Utilities Management

Project Description

This project consists of four phases, each of which will be composed of 400-500 lots and will require the design and construction of a sewer collection system and water transmission system to serve the lots within the phased project area. This will include all aspects of the associated sewer and water system expansions including, but not limited to, connection to the existing systems, hydraulic modeling, system sizing, permitting, lift station location determination/confirmation, septic tank abandonment, plumbing to connect water and wastewater, subsurface utility engineering, soil boring exploration, survey easement identification, paid capacity fees, pipe infrastructure, manholes, valves, fire hydrants, water and wastewater service assemblies, and restoration.

Project Detail**

Project: VCC000001 Title: Gateway Signage 42nd St Flyover
 Department: Visitors and Convention Bureau

Project Description

Gateway Signage located at the 42nd Street Flyover (facing northbound traffic) over Interstate 75. This project is being executed within the confines of the Florida Department of Transportation Community Aesthetic Feature (CAF) Program. The purpose of this signage is to create a sense of place for visitor arrivals and to meet previously unmet tourism needs related to welcoming traffic to exit into Marion County from the Interstate 75 corridor.

Project: VCC000002 Title: Gateway Signage NW 49th Street
 Department: Visitors and Convention Bureau

Project Description

Proposed future Gateway Signage located at the future planned NW 49th Street Interchange (facing southbound traffic) over Interstate 75. This project is being executed within the confines of the Florida Department of Transportation Community Aesthetic Feature (CAF) Program. The purpose of this signage is to create a sense of place for visitor arrivals and to meet previously unmet tourism needs related to welcoming traffic to exit into Marion County from the Interstate 75 corridor.

Project Detail**

Project: VCC000003 Title: North County Line Gateway Sign
 Department: Visitors and Convention Bureau

Project Description

This project is to construct an entryway pillar at the northern county line of Marion County. This project is being executed within the confines of the Florida Department of Transportation Community Aesthetic Feature (CAF) Program. This would establish the northern entry point to Marion County and welcome southbound visitors to the area.

Project Detail**

Project: VCC000005 Title: Visitor Center Signage
 Department: Visitors and Convention Bureau

Project Description

The Visitors Center is located in downtown Ocala, adjacent to several other government buildings. A monument sign and new affixed building signage will be designed in accordance with brand standards and will further differentiate the Visitors Center and the welcome stop for tourists to Marion County.
