Marion County Board of County Commissioners
601 SE 25th Avenue
Ocala, Florida 34471

Dear Commissioners,

Provided herein, is the Adopted Capital Improvement Program for fiscal years 2025/26 – 2029/30. This document serves to provide the Board of County Commissioners with an overview of funding for the Capital Improvement needs of the County over the next five fiscal years. This document does not address the County's Transportation Improvement Program which is adopted separately. The Capital Improvement Program serves only as a capital outlay funding plan and does not represent an official appropriation of County funds. Official appropriations for capital projects are dependent upon their inclusion in the current and future annual budgets of the county as adopted through the statutorily required annual budget process.

For the five fiscal years 2025-26 – 2029/30 the Capital Improvement Program is proposed in the total amount of \$581,891,993. This total includes projects covering a broad range of purposes and funding sources. In addition to \$32,425,361 appropriated for General Capital Improvement projects, the Capital Improvement Program includes total project amounts of \$239,359,539 for Transportation Projects, \$107,629,000 for Utilities, \$58,280,000 for Solid Waste, \$57,925,000 for Fire Rescue and EMS, \$57,023,990 for Sheriff, \$15,057,558 for Airport, and \$14,191,545 for Parks and Recreation.

The Capital Improvement Program includes \$354,308,529 for capital projects utilizing a portion of the proceeds of the 1% Local Option Infrastructure Sales Surtax levied in calendar years 2017 through 2020, 2021 through 2024 and 2025 through 2045 as approved by public referendum.

Marion County Clerk of Court and Comptroller

A general revenue appropriation of \$12,904,950 for fiscal year 2025/26 is funded in the County's proposed fiscal year 2025/26 budget. Other countywide projects in the amount of \$19,020,411 for future years 2026/27 and beyond are included in the Capital Improvement Program and are currently designated as "Operating Revenue". These projects will remain under consideration for funding as future annual budgets are proposed and subsequently adopted.

We would be pleased to answer any questions concerning the Capital Improvement Program or provide further information as needed.

Respectfully submitted,

A handwritten signature in black ink that reads "Gregory C. Harrell". The signature is written in a cursive style with a large, looped "G" and "H".

GREGORY C. HARRELL
Clerk of Court and Comptroller
Marion County, Florida

Tentative Capital Improvement Program Project Detail

Marion County Board of County Commissioners
Tentative Capital Improvement Program - Fiscal Years 2026 - 2030
Project Detail

Project: ASC000001 Title: New Animal Center Construction
 Department: Animal Services

Project Description

The needs of the Animal Services department have outgrown the current facilities capacity to provide healthy and sustainable living conditions for the animals being housed for adoption. The transition to a no-kill shelter created additional challenges with having the needed isolation and treatment areas for longer term care without expanding the current facility. The 30 plus year old facility was not designed to address the new mission and due to site limitations, growth at the current location is very challenging. Marion County has procured a new site that has the ability to construct new modern structures designed to meet the needs of the animals and staff, while providing better conditions to promote adoption and quality of life.

Tentative Capital Improvement Program - Fiscal Years 2026 - 2030
Project Detail

Project: ASC000002
 Department: Animal Services

Title: Kennel Door Install and Floor Seal

Project Description

Animal Services was recently awarded a grant that will replace 62 gates and CIP funding is needed to replace the remaining 134 gates, this will equal the replacement of 196 kennel gates. These gates will provide a safe and aesthetic barrier for the animals and are rugged, easier to clean and designed for longevity. The gates also offer a visual barrier between kennels which will help lower the noise level as the animals will not be able to see each other and therefore are less likely to bark. In addition, the kennels, walkways and breezeways will be power washed and sealed, which will mitigate slip hazards for citizens and employees. The projected cost of \$250,000 will include both the materials and labor to install the gates as well as power wash, prep and apply two (2) coats of sealant throughout.

Project: BDC202001 Title: Growth Services Training Room Remodel
 Department: Building Department

Project Description

To remodel the training room located in the Growth Services Building. The training room will be brought up to modern standards to allow professional presentations as well as several advisory board meetings to be successfully conducted. Items in this project include building an ADA accessible stage, adding acoustical panels and ceiling tiles, new flooring, painting and upgrading the HVAC system to help reduce the humidity.

Title: Extension Services Storage Lab Space

Department: Facilities Management

Project Description

Extension Services current storage and lab space is in need of a renovation to the existing building to make it more efficient and usable to the department. The increased need of programs and services to Marion County residents due to growth within the county is strongly felt with all current space being utilized as offices and meeting rooms, limiting the available space for consultations, meetings, videotaped programs, etc. The renovation of the storage area, an environmentally controlled space, will allow additional space to accommodate programming for 4-H youth development and storage space which will house the supplies and materials used in the programs of the various agents. Increases in participant attendance and services are justified in report of activities each agent submits at the end of the physical year. Because the building is plumbed, the addition of the restroom is justified as it will allow students to utilize the restroom without having to leave the secure building site to go into the primary building without supervision. Often the programs are delivered at night as this supports the availability of the attendants.

Project: FLC000001 Title: Consolidated Fleet Facility
 Department: Fleet Management

Project Description

This will be a new facility for Fleet Management. The new shop will be a single building encompassing all 4 shops to include our Fleet Administration Office and parts room. The new building will be 82,000 square feet with our administration office in the front, with 32 bays and a centralized parts room. Fleet Management is in need due to the age and size of our current facility. As our fleet grows and the demand of our citizens increase, Fleet Management is required to keep up with our service needs of all of our vehicles and equipment. This will also include our Fire Fleet, which continues to grow every year. Fleet Management has outgrown their current facility.

Project: FMC000002 Title: Energy Management Control
 Department: Facilities Management

Project Description

To purchase and the installation of an updated energy management system (EMS) that will serve the Sheriff's Special Operations building and the Florida Department of Health buildings. Both of these locations are currently equipped with an outdated Staefa control system. These outdated systems are obsolete and are difficult to obtain replacement parts. The EMS system provides control of the heating, ventilation, and air conditioning system and fundamental information to perform real-time system controls to efficiently operate the building. These systems will be updated to Computrol, a modern EMS platform.

Project: FMC000026 Title: Commissioners Auditorium Remodel
 Department: Facilities Management

Project Description

The auditorium holds the Marion County Board of County Commissioners board meetings, workshops, and public hearings. The auditorium is also used for public meetings, the value adjustment board hearings, planning and zoning advisory board hearings as well as miscellaneous training. The scope of work will include acoustic treatment, lighting modification, furniture re-design, and HVAC system replacement. The HVAC updates will assist in better air quality and circulation within the audience section of the auditorium. The lighting and acoustic treatments will result in an improved indoor environment for the citizens during events held in the auditorium.

Title: Security Upgrades Countywide Buildings

Department: Facilities Management

Project Description

To upgrade the security level of various county-owned buildings that are at medium to high risk or have high public traffic. This project will be a furtherance of the 2020 efforts to enhance the checkpoint security of Marion County Judicial Center and the Administration building. Based on individual site requirements, the enhancements will include, but are not limited to, upgrades such as hardening of walls and glass, dedicated checkpoints, building access control, confidentiality sound control, and surveillance systems.

Title: Jail Replace Staefa with Computrol

Department: Facilities Management

Project Description

During a property condition assessment done by Partner Engineering in August 2020, it was identified that the Landis & Staefa building automation system was obsolete with parts no longer available for the system. Furthermore, it was found that there are high costs incurred through outside vendors as Facilities personnel are not able to make changes to the system in-house. An additional on-site automation system, the ICE, is in good condition, but the system is proprietary. Based on the current condition and the estimated remaining useful life of the two (2) systems, it was recommended to combine these systems into a new system using non-proprietary platform.

Title: Jail Replace Solar Panels

Department: Facilities Management

Project Description

To extend the life of the solar hot water heating array, located at the Marion County Jail. The 100-panel solar hot water system is located near the B Pod and was installed circa 2010 using federal grant funds. These panels preheat the cold water before it enters the hot water heaters, creating a significant reduction of the required energy to supply hot water to the jail. This project is to replace approximately 34 damaged or deteriorating hot water solar panels as well as the damaged insulation.

Project: FMC000039 Title: Clerk's IT Closet
 Department: Facilities Management

Project Description

At the October 20, 2020 BCC meeting, the Clerk of Circuit Court and Comptroller requested to use \$360,000 from prior year funds to construct and remodel the Clerk IT building switch closets. The existing closets are full and separate closets are needed for IT and Facilities. This separation will improve security of the IT switch closet. This separation will also provide MCC IT the opportunity to continue to improve their Disaster Recovery (DR) response, improve the cabling between switches and floors to increase redundancy and improve overall infrastructure by having an additional firewall with increased remote-site work availability. Space for the IT equipment was identified by using a portion of the ladies' restrooms on each floor, next to the existing switch closets.

Title: JC3 Third Floor Buildout

Department: Facilities Management

Project Description

The JC3 expansion was constructed in 2008, with the third and fourth floor shelled out for future use. The fourth floor is scheduled to be constructed in 2022 to provide an additional high-capacity courtroom and additional workspace for the State Attorney. The third floor has approximately 30,000 square feet of useable work space to help optimize Marion County work space or building optimization. A possibility for this buildout included relocating Clerk Annex employees and other agencies requiring a high-security atmosphere and centralized locations. This project would support vacating other county-owned buildings for additional strategic and growth options.

Title: 4H Farm Septic to Sewer

Department: Facilities Management

Project Description

Marion County Facilities Management is entering into a memorandum of understanding with Marion County Utilities regarding the 4-H Farm Septic to Sewer conversion. Marion County Utilities applied for and was awarded a grant from St. Johns River Water Management District for a 50% matching grant up to \$130,000. While Utilities will lead the efforts for design, permitting and construction of the project, Facilities will provide the 50% match of \$65,000 plus any additional fees above the \$130,000. At this time and based upon Utilities estimated schedule of fees, the cost of the project will be around \$178,016.78. The purpose of this project is for the 4H farm to cease the use of a septic system and instead connect to the public wastewater system. After completion of the project, Facilities Management will maintain the lines until the point of connection at which point it will become the responsibility of Marion County Utilities.

Project: FMC000047 Title: Medical Examiner Generator Replacement
 Department: Facilities Management

Project Description

Marion county is responsible for the maintenance and operational support of the Leesburg Medical Examiner building. The Medical Examiner’s Office is a critical part of law enforcement and community health functions. This requires the building to be functional during all major events (weather, health, natural disasters, etc.). The current generator is non-functioning and unrepairable due to age and condition. There is a rental unit in place now, however the cost of renting the temporary unit is highly expensive and will quickly approach the purchase price of a replacement unit. This project is for a complete replacement of the generator unit to include removal of the non-functioning unit and installation of a new unit inclusive of a transfer switch, feeder wire, emergency stop button and remediation to the concrete slab.

Project: FMC000051 Title: Facilities Inventory and Storage
 Department: Facilities Management

Project Description

Facilities Management, as well as various other departments, are currently utilizing the unoccupied side of the Wellness Center for storage. In an effort to organize and secure these areas, Facilities will be creating 5-6 individual areas within this space which will be access controlled. In addition to securing this space, Facilities will be installing 3,150 Sf of mezzanine space within the current inventory area located at the Facilities Management building. This will provide an additional 40% capacity for inventory control and storage of maintenance items. Utilizing this method of capacity expansion is 4-1/2 times less expensive than building onto the existing building, at a comparison of \$51.05 per SF vs \$250.00 per SF new construction cost. This is possible due to the ceiling height of the current inventory/storage space.

Title: JC3 Fourth Floor Buildout Phase 2

Department: Facilities Management

Project Description

The new construction buildout for JC3, fourth floor includes 5,414 SF of currently unoccupied space. This space is slated for court administration for the Fifth Judicial Circuit and focuses on consolidating dispersed staff into a unified location for improved efficiency. This involves plans to accommodate various administrative functions and encompasses the design of collaborative workspaces, meeting rooms and technology integration with new server rooms. The goal is to enhance operational synergy, optimize workflow, and provide a centralized hub for streamlined court administration processes.

Title: JC1 Roof Replacement

Department: Facilities Management

Project Description

The current JC1 roof was installed over 25 years ago and the warranty has since expired in 2017. The roof began experiencing leaks during a hurricane in the summer of 2023 and reoccurring storms have since caused issues including drywall damage, dampened insulation as well as tiles that have to be replaced each time leaks occur. The areas of concern include leaks over office spaces as well as publicly frequented areas such as the elevator entrance and lobby. While Facilities did apply a temporary coating of sealant to prolong the need to replace the roof, the manufacturer has since agreed that the roof has met it's end of life and needs to be replaced.

Project: FMC000055 Title: Library HQ Roof Replacement
 Department: Facilities Management

Project Description

The current roof on the Library headquarters building is over 20 years old and the warranty has since expired in 2020. Various areas of the roof have began to experience leaks during rain storms and have been reported by employees and the public alike. These leaks have caused the insulation and ceiling tiles to get wet, putting them at risk for mildew and mold. Furthermore, continual leaks could damage the underlayment decking and penetration into the building could damage the books. Facilities has made several repairs to the membrane including an outside contractor that repaired the seams, however, per the manufacturer and roofing contractors, this roof is due to be replaced within the upcoming years.

Project: FMC000057 Title: Belleview Library HVAC Replacement
 Department: Facilities Management

Project Description

The Belleview Library is in need of replacing four (4) condensers and two (2) air handler units which have surpassed their life expectancy and are over 20 years in age. The current units have already incurred partial system failures on numerous occasions and are requiring significant repairs which have shown the systems are becoming less efficient and more costly each time. This library is a widely used facility by the public and houses library staff, as well as books and other materials that require temperature control.

Project: FMC000060 Title: Library HQ Chiller and Pump Replacement
 Department: Facilities Management

Project Description

The Library Headquarters is in need of replacing two (2), 250-ton chillers and pumps, which are the sole source for cooling the facility, it's patrons and staff. The current system is aged out at over 20 years old and has undergone numerous critical repairs. These repairs have included replacement of the compressors and motors, the on-board electrical breakers and rewiring the majority of the load carrying conductors. The replacement of this system is paramount to continue normal operations with temperature control for the patrons, staff and temperature controlled materials.

Project: FMC000064 Title: JC2 Boilers and Pumps Replacement
 Department: Facilities Management

Project Description

The JC2 boilers and pumps have been in operation for over 30 years, since 1992. These boilers provide heat for all JC2 including Court Administration, Judges' areas and ten (10) courtrooms. While the current units have served well with minimal breakdowns, we would like to plan proactively to replace them to ensure reliable heating for the court system, judges and public.

Project: FMC000065 Title: Jail E and F Pod Generator Replacement
 Department: Facilities Management

Project Description

A generator located at the Marion County Jail services E & F pods for inmate housing, as well as the staff that work in these areas. In times of power outages, this generator provides essential life safety, ventilation, lighting and door control. This unit is currently 34 years old and should be replaced due to its age and more frequent, costly repairs, leaving the generator inoperable for months at a time and costly replacements having to be brought in.

Title: MCSO Multi Purpose Generator

Department: Facilities Management

Project Description

Located on the Marion County Jail complex is a multi-purpose building which includes video visitation, the Sheriff's conference area and is also used as an assembly area under hurricane conditions as it is a larger area than EOC. While this location does not currently have a generator of its own, an MCSO portable generator, or rental generators, have been used in times of hurricanes over the last five (5) years. Emergency Management has requested a generator be purchased to service this area more permanently during hurricanes and power outages.

Project: FRC000016 Title: Fire Station HVAC Replacement
 Department: Fire Rescue Services

Project Description

The Fire Station HVAC Replacement project will address indoor air quality concerns in fire stations that have increased its occupancy level outside of the original building design criteria. The current structure, occupants, and the future needs of the building will be assessed, then a custom solution will be developed to ensure the structure will operate within proper air quality parameters in the future. Coordination with Fire will identify the highest priority for this FY.

 Department: Fire Rescue Services

Project Description

The Fire Station Roof Standardization project will address the aging Fire Station roofs before failures occur. The aging composite roof material will be replaced with a standing seam metal roof. Coordination with Fire will identify the highest priority for this FY.

Title: West EMS Station

Project Description

Marion County Fire Rescue (MCFR) is planning to acquire land and build a new Emergency Medical System (EMS) west station. Our current location, a lease at the City of Ocala Fire Station 6, is not in the best location for MCFR's support of the west side of the City of Ocala and surrounding county areas. Furthermore, the lease was not intended for continuous twenty-four hour occupation and has recently increased in price. Building a new station in a better location will help to provide EMS to meet the needs of the rapidly expanding area.

Title: Fire Station 11 Rebuild

Department: Fire Rescue Services

Project Description

To rebuilds the existing aged-structure with a new 10,000 sq/ft (est.) Fire Station on property located at the entrance of the Florida State Fire College. This modern building will follow the current building codes and construction methods to meet the needs of our citizens and first responders, including eventual growth needs in the community. This project also includes demolishing the existing Fire Station, repurposing this parcel for County or community needs.

Project: FRC000022 Title: Fire Station 9 Orange Lake
 Department: Fire Rescue Services

Project Description

Station #9 (Orange Lake) was built in 1980 and has met its capacity for service. MCFR would like to construct a new station on a different site to accommodate for expansion and community growth. The station would have a capacity for five (5) crew members per shift with future capacity for eight (8) crew members per shift.

Project: FRC000023 Title: Fire Station 24 Marion Oaks
 Department: Fire Rescue Services

Project Description

Station #24 (Marion Oaks) was built in 1983 and has met its capacity for service. The station will be rebuilt on new property (parcel no. 8001-0000106) as it is currently sited on parcel no. 8001-0000100. This rebuilt fire station will accommodate for community growth and will have a capacity for eight (8) crew members per shift with a future capacity for ten (10). This station will also have the potential to house an additional squad or ladder due to its proximity to the Florida Crossroads Commerce Park and the interstate.

Title: Fire Station 20 Golden Ocala Expansion

Department: Fire Rescue Services

Project Description

Due to the growth in the northwest section of Marion County, Fire Station 20 Golden Ocala requires an expansion to support increased services. The existing living quarters will be renovated, and one existing apparatus bay, approximately 880 square feet, will be added to the new living quarters footprint. Two additional apparatus bays, gear room, and storage area will be added to existing bays. The expansion will bring the four-bay station to an estimated 10,000 square feet.

Project: FRC000029 Title: Fire Rescue Training Facility
 Department: Fire Rescue Services

Project Description

Marion County Fire Rescue will be relocating its current training grounds. The new training site will better accommodate the growing department, allowing for additional classroom space and a larger training grounds facility to better train new hire and incumbent employees each year. This will include a two-phased approach, whereby Phase I will include the purchase of a modular building and classroom, as well as training grounds built to include conex boxes utilized for a single story structure live fire training prop, a search and rescue multi-story prop, a rehabilitation building and an extrication pad to simulate motor vehicle collision extrication drills. Phase II will include a brick and mortar (permanent) structure to include a fire station on site.

Project: FRC000030 Title: Fire HQ Generator
 Department: Facilities Management

Project Description

Marion County Fire Rescue was awarded a Hazard Mitigation Grant (FEMA-DR-4486-FL) to purchase a generator for Fire Rescue headquarters, currently located at 2631 SE 3rd Street, Ocala, FL. This building shares space with the Procurement Services Department. This grant is beneficial to the entire building as the financial sector of Marion County and Marion County Fire Rescue are housed in the building, which can be subject to power outages, especially during emergency disasters. It is beneficial to install a whole building generator so that the building can operate with power as it is critical after a disaster that the departments can return to work in order to help the financial sector of Marion County rebuild and operate.

Project: FRC000031 Title: Fire Station Orange Springs
 Department: Fire Rescue Services

Project Description

Fire station 13 is currently located in Orange Springs at situs 23520 NE Highway 315, Ft. McCoy, FL 32134. The building located on parcel 0013-057-101 will need to be rehabilitated. MCFR will work with Facilities Management on the station needs, whether the station can be rehabilitated in any manner or if a new modular build is needed for the location. This station is anticipated to house a minimum of 11 people to staff a single engine. The building will need to have sleeping quarters, a kitchen area, dining, restrooms/showers, laundry and bunker gear storage. The situs may require DRA work, parking/sidewalk, etc. and associated permitting fees to prep for use.

Project: FRC000032 Title: Fire Station 10 Villages Remodel
 Department: Fire Rescue Services

Project Description

Fire Station 10 (The Villages) is in need of an expansion remodel. This station currently houses an engine and two (2) rescues. Due to the large call volume in that zone, the demand requires additional truck(s), needed for response. With the current build layout, there is no room for additional crew members. One (1) of the complications with this location is that there is no additional property to build/expand outward. The new station design will likely need to have a second story added to the existing structure to accomplish the expansion needs. Another item to consider is the station does not meet current NFPA standards. There is not currently hot, warm and cold zone standards for decontamination upon entrance to the living area. The doors from the living quarters exit directly into the bay, instead of having a positive pressure air zone to ensure that fumes and carcinogens do not enter the living quarters. The new station design will be in compliance with cancer prevention efforts.

Project: FRC000033 Title: Fire Station 17 Shores Rebuild
 Department: Fire Rescue Services

Project Description

Fire Station 17 (Shores) requires a newer structure, due to the current age and condition of the existing building. Outside of the timeframe for consideration of a rebuild, in the next 5 years the station will be adding a second rescue, followed by additional staff through a ladder company to meet increased demand in the zone. This would add approximately 19 additional personnel. This station does not meet the current NFPA standards. Currently there is not hot, warm and cold zone standards for decontamination upon entrance to the living area. The doors from the living quarters exit directly into the bay, instead of having a positive pressure air zone to ensure that fumes/carcinogens do not enter the living quarters. The new station design will be in compliance with cancer prevention efforts.

Project: HDC000001 Title: Belleview Health Department Building
 Department: Facilities Management

Project Description

The Belleview Health Department, currently a 25+ year modular building, is well past it's expected life. Facilities Management has already replaced all HVAC units once and they will need to be replaced again within the next two to three years. Furthermore, the roof has been replaced as well as the floor decking and repairs done to many sections of the access ramps and steps leading into the facility. The current structural condition of the facility is in fair to poor condition and there are minimal possibilities to remodel the building in order to make it more compatible with current health care facility functions. Facilities Management had recommended this structure be replaced years ago due to the increased maintenance costs and therefore a new health facility will be built on the existing property to replace the aging modular building currently in use.

Project Detail

Project: HDC000002 Title: Health Department Rooftop HVAC Replacement

Department: Facilities Management

Project Description

The Marion County Health Department is conditioned by a robust GovernAir, rooftop unit. This unit is at the end of its lifecycle and has endured many repairs and replacement parts to the internal operating system including the condenser coils and motors. Furthermore, the frame is losing integrity and strength as there is a significant amount of rust externally. This facility receives heavy public usage as well as houses staff of the health department five (5) days a week. Fresh air supply to such a facility is imperative to improve the indoor air quality where medical services such as immunizations, family planning, pediatric health and other services are rendered.

Project: ITC000003 Title: Server Room Expansion and Upgrade
 Department: Information Technology

Project Description

To modify the current main Information Technology building. The project will include the expansion or remodeling of the current space to account for planned growth and efficient operations of the IT personnel. The project will also either relocate the main IT server room to the expanded building envelope or enhance the current location to be more robust in order to resist disturbance or damage to the equipment during inclement weather.

Project: ITC000004 Title: Cybersecurity Upgrades
 Department: Information Technology

Project Description

Cybersecurity is a constant evolution of technologies and methods to protect computer networks, systems, and data against sophisticated cyber threats. Security experts predict that in 2021 there will be a cyber-attack incident every 11 seconds. Information Technology continually evaluates developing industry trends and technologies to provide the best line of defense for our employees and citizens. The following initiatives are identified to provide the greatest security enhancements for the organization: Advanced Endpoint Protection with Artificial Intelligence (AI), Multi-Factor Authentication, Password Management Solution, Privileged Access Management, cutting-edge (2021) firewall technology, Web Application Filtering (WAF), Security Event and Incident Management (SEIM), and Identity Service Engine (ISE).

Project: LBC375013 Title: Freedom Public Library Expansion
 Department: Public Library System

Project Description

The expansion of the Freedom Public Library will enable to library system to better meet the informational, educational and entertainment needs of the ever expanding population in the SR200 corridor. By dividing the project funding into first the design phase and next the construction phase, it will allow the library to apply for up to \$500,000 in state construction grant funds. The existing library was designed and constructed with storefront windows on two sides to more easily expand in two directions. Some renovation will be needed to the existing facility which opened in 2000. Off-site water retention will enable maximum utilization of the site.

Project: LPC202003 Title: SELP Sales Arena Remodel
 Department: Southeast Livestock Pavilion

Project Description

The ceiling in the sales arena needs to be raised to allow better sound quality and reduce moisture. Facilities suggested leaving the ceiling open rather than replacing ceiling tiles. The restrooms are not ADA-compliant and need to be completely remodeled. It has been discussed to combine the restrooms on each side to create one men's restroom and one women's restroom for more space to become compliant. This project will raise the ceiling, improve the sound quality, upgrade the sound system, and construct two ADA-compliant restrooms.

Project: LPC202004 Title: SELP Campground
 Department: Southeast Livestock Pavilion

Project Description

Design and construction of a campground at the Southeastern Livestock Pavilion. The campground was previously designed as the part of the phase 3 expansion project for the SELP in 2018. The engineering firm will update the existing plans to current standards and codes. The campground will consist of paved, full hook up campsites to the north east of the SELP property next to the back arena. Another project addition will be the new entrance road off of Jacksonville Rd to the SELP facility.

Project: LPC202102 Title: SELP Announcers Tower and Office
 Department: Southeast Livestock Pavilion

Project Description

The current announcers tower and event office has several major facility issues that after Facilities review of the project it is encouraged and cost effective to build a new tower. The current announcers tower does not provide a secure or proper climate control environment necessary for the A/V equipment in the office. The flooring in the tower is becoming a danger due to age. The walls in the tower and event office have extensive water damage. The new tower will be a block building 550 sq. ft.

Project: LPC202104 Title: SELP Gate 2 Entrance Enhancement
 Department: Southeast Livestock Pavilion

Project Description

This is a multi-phase project which includes changing the main entrance driveway to the facility and aligning the entrance for easier trailer access. This project will also create a new entrance gate that will be an aesthetic addition for the entry to the facility. The chain link fencing will be removed and replaced with new decorative security fencing. Phases of this project include two phases. Design, engineering and permitting is expected to cost \$20,000 and construction is expected to cost \$380,000. This project will improve the safety and security for visitors at this facility. This includes foot traffic, guests arriving and leaving the Livestock Pavilion for an event and event staff/participants who are often pulling large trailers. This project will also decrease water runoff into the Extension Office Parking Area. Additionally, this project improves the overall functionality and aesthetic for guests and event holders alike, therefore improving the overall customer experience.

Title: Recreation Hall Remodel

Department: Southeast Livestock Pavilion

Project Description

The Southeastern Livestock Pavilion will be converting the Recreation Hall into offices and storage. Improvements will include a medium to large conference room, two smaller offices and a cleaning supply room. Additionally, the existing restroom in the Recreation Hall will be remodeled to bring it current with current ADA compliance standards. This project will improve functionality and efficiency of staff at the facility by moving all offices into one central location. This project will also create a restroom designated for staff use, rather than sharing a restroom associated with a rental space.

Project: LPC202301 Title: SELP Dave Baillie Arena Grandstands
 Department: Southeast Livestock Pavilion

Project Description

The Dave Baillie Arena Grandstands, located at the South Eastern Livestock Pavilion, are over 20 years old and have been subjected to heavy use over the years. The covered arena is booked approximately 48 weeks out of the year with over 300,000 people attending these events. Certain events have as many as 7,500 people in the stands per day. Safety concerns include some areas of the stands being warped, worn, and unstable. Furthermore, the upper levels are enclosed by chain link fencing that is secured to the stands with metal wire. While some repairs were done to the stands in May of 2022, it has been recommended that replacement of the stands is necessary to prevent any future safety issues.

Project: LPC202304 Title: SELP Arenas Sound Upgrade
 Department: Southeast Livestock Pavilion

Project Description

The Southeastern Livestock Pavilion (SELP) can serve as many as 7,500 people per day for field events, exhibitions, receptions, and other happenings. Providing rental services and with a public announcement system in every covered area, clear audio that can be zoned to specific or all areas is necessary as well as a means to lock the system. While the original system has been repaired various times over the last 20 years, the audio continues to have feedback issues and cannot be heard throughout the entire facility. This project will review the need and upgrade all components to achieve optimal audio throughout.

Project: LPC202401 Title: SELP Campground Restroom and Shower
 Department: Facilities Management

Project Description

This is an approved SELP Master plan project consisting of the construction of an 8-hole Parks Standard restroom with showers for the new campground. The campgrounds have the ability to host 66 campers, however do not have a facility to accommodate them. The nearest restroom is a distance away from the campgrounds at the picnic pavilion. Campers would have to travel outside the fenced area of the campgrounds to access the restroom area. All other restrooms are located within the facility fences that are locked every night after business hours and must remain locked during some events. This improvement will provide a safe customer experience for our guests.

Title: Design And Construct 20 T-Hangars

Project Description

Design and construction of twenty (20) T-Hangars at the Marion County Airport. The new T-Hangars will replace the previous plan to construct quad boxes at the airport. T-Hangars are a high demand for new tenants at the airport since all hangars are at 100% occupancy. The new T-Hangars will be on an annual lease agreement and will increase the lease revenues and fuel sales at the airport.

Title: Fuel Farm Replacement

Project Description

Plan, design and replace the existing fuel farm to improve the level of service. The new fuel farm will consist of adding two (2) 12,000 gallon fuel tanks; one (1) AvGas and one (1) JetA. The current system is over 20 years old and constantly has mechanical and technical issues that require reoccurring maintenance expense. The new system will improve customer service experience and reduce maintenance expense.

Title: T-Hangar Construction

Project Description

The multi-phase project will consist of the construction of 20 T-Hangar rental units. The completion of this project will increase the airport's economic impact for Marion County. Additionally, increasing the number of T-Hangars will meet the demand for quality multi-purpose, specialized facilities from both local and traveling customers. The design, engineering and permitting are planned to take place in FY24 while the construction is planned to take place in FY25.

Title: Airport Projects

Project Description

The Airport Taxiway is part of the airport master plan and includes both state and federal grant match funding. Phase 1 (FY23) will consist of the design of a full-length parallel taxiway (5,000'x35) to the primary runway 5-23, including the necessary holding bays for aircraft run-up. The project will also include LED taxiway lights, LED position and directional signs and a new L-828 regulator. The necessary marking and drainage will also be designed. This project will be designed to meet the current design aircraft consistent with the airport master plan. Phase 2 (FY25) of this project will include the taxiway for runways 5-23 and 10-28. This project will directly enhance safety and capacity at the airport by limiting inadvertent access and back taxi activity on the active runways. Full parallel taxiways are also recommended as a standard airport design element by the FAA and are a recognized airport layout to pilots.

Title: Airport Runway Rehab 5/23

Project Description

Plan, design, and resurface runway 5/23 in accordance with FAA regulations and local code. This is a 5000' x 100' paved and lighted runway with both PAPI (Precision Approach Path Indicators) and an instrument approach for landing with visual restrictions or obstructions. The Airport is adding infrastructure to support the demand for the forecasted aviation growth in the County's transportation system. The Marion County Airport primary runway (5/23) surface has exceeded its projected life expectancy and requires resurfacing. Airport surfaces are graded annually by state aviation inspectors; FDOT has designated runway 5/23 as in need of repair.

Title: Airport Weather Station

Project Description

An aviation weather system would provide real-time weather details to pilots to assist in their flight planning including landing, takeoff, and enroute weather concerns. Critical information that would convey includes wins (direction, speed & gusts), temp, dew point, altimeter, cloud ceilings, precipitation as well as forecasted weather. This station would also provide weather information to the general population and be instrumental during weather-related natural disasters.

Project: MEC000001 Title: New Medical Examiner Facility
 Department: Facilities Management

Project Description

The Medical Examiner Advisory Board for Districts 5 and 24 is working with MCFR to develop a state-of-the-art facility to replace the current Medical Examiner's building located at 809 Pine St., Leesburg, FL 34748. The facility serves the Counties in District 5 (Sumter, Marion, Lake, Citrus, and Hernando) and District 24 (Seminole), but it has outgrown its current location and is in need of expansion. The new site, which will be situated on 10+ acres, will be designed to accommodate the ME office and work space. The Facilities Management team is partnering with MCFR to ensure that the new building is modern and functional, featuring separate morgue and administrative spaces that allow for proper division of functions while still allowing for efficient communication between teams.

Project: MOC510001 Title: Marion Oaks Community Center Reroof
 Department: MSTU - Marion Oaks Recreation

Project Description

Due to multiple leaks and wear and tear, the Marion Oaks Community Center's roof is in need of replacement. The existing roof system, which spans Buildings A, B, and the connecting cross-over section, is approximately 32 years old and has reached the end of its lifespan. To address these issues and ensure continued protection of the community center, MSTU has initiated a significant roof replacement project. This project will involve the complete removal and replacement of all roofing materials, encompassing both the existing flat roof and the sloped tile roofing.

Title: 800 MHz System Infrastructure Upgrade

Project Description

The 800Mhz Radio system was constructed in 2005 and is currently transmitting data via predominately T-1 circuit connections, which at the time was the high capacity system. With the addition of several tower sites and increasing use of bandwidth, this older technology is no longer able to maintain the data transmission capacity needed and prevents expansion of the system. Further, the operational cost of the T-1 circuitry continues to increase, as fewer companies offer this, or maintain the lines and T-1 can be unstable under certain conditions. This project will allow the Marion County Radio System to upgrade to an Ether-net and fiber based data transmission system, enhancing the stability and capacity of the radio system.

Title: Tower Expansion

Project Description

Public Safety Communications in partnership with Motorola Solutions, Inc. ("Motorola Solutions") is proposing a modification of the existing radios system. Leveraging the County's historical investment in its Project 25 (P25) public safety radio system, the proposed solution will increase the coverage performance of the emergency communications network to provide 95% on-the-street coverage for portable and mobile radios, as well as improved in-building coverage. The expansion of the existing radio system is a critical step that will allow the existing network to grow in tandem with Marion County's community and to continue to provide a high level of service for all system users. Additionally, the improved radio system coverage will dramatically impact all public safety operations conducted by Marion County Fire Rescue, the Marion County Sheriff's Office, and Dunnellon Police Department, Belleview Police Department. The solution proposed for the ASTRO 25 Radio System Coverage Expansion includes the following elements:– New Simulcast Remote Site and Tower for the Marion Oaks area– New Simulcast Remote Site and Tower for the Sparr area– New Simulcast Remote Site leveraging as existing tower for the Salt Springs area– Upgrade of the existing Dunnellon Water Tower to Simulcast operation

Project: PDC000001 Title: Public Defender Building Expansion
 Department: Facilities Management

Project Description

The Public Defender has requested an expansion proposal in our yearly Capital Improvement Program since roughly 2008, based on county-funded personnel projection study performed in 2007. In our FY15-16 request, we revised our estimated growth. It is anticipated that over the next three (3) years our Marion County location could increase by fifteen (15) employees. Our current location is unable to absorb this growth, requiring an increase of space. One option to accommodate our anticipated growth would be to add an additional 10,000 square feet to our current Public Defender building located at 204 NW 3rd Avenue in Ocala, FL. The current Public Defender building is 13,000 square feet, with the requested addition bringing it to 23,000 square feet.

Project: PRC202002 Title: Gores Landing Improvements
 Department: Parks and Recreation

Project Description

The Gores Landing Improvement is a master plan project that will be completed in two phases. Phase 1 will include the design, engineering, permitting, and removal of existing structures and new construction. Phase 2 will include the removal of existing restrooms; construction of ADA-accessible restrooms that includes showers, mirrors, and hot water; replace existing antiquated wastewater system; replace existing boat ramp with single lane ramp; rework boat channel; establish designated trailer parking with ADA access; construct ADA lateral fishing platform; establish designated campsites with amenities and ADA access; pave interior drive, handicap parking, and sidewalks; install bear-proof trash cans; and establish designated host camper site. This project will significantly increase safety for park guests utilizing the boat ramp, improve the functionality of the boat ramp, address ADA accessibility, and enhance the overall guest experience. Additionally, this project will enhance environmental safety by modernizing the wastewater treatment system. Gores Landing is a resource-based park providing opportunities for camping and aquatic recreation. This project consists of a four-hole with showers park standard restroom facility, a two-stall parking lot, ADA compliant ramp, and a new advanced treatment sewage system at the park. The restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. Facilities management department involvement will include overseeing the construction of a 800+/- sf restroom facility. The Feasibility study was completed in FY 2022. The restroom facility will be located near the existing pedestrian parking lot. Architectural and engineering is slated for FY 2026 with anticipated construction in FY 2027.

 Department: Parks and Recreation

Project Description

The Belleview Sportsplex park improvement will be a multi-phase project. Phase 1 was a master plan for the entire Sportsplex, which will be completed in FY 2023. Phase 2 consists of the demolition and construction of (5) baseball fields and (2) tee ball fields and the construction of a community park on 17 Ac which is owned by the City of Belleview. The community park will consist of a parking lot, playground, basketball and volleyball courts, and walking trails. Facilities management department involvement will include overseeing the construction of (1) 4,400 +/- sf two-story concession/ restroom facility. The restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. The concession buildings are located in the center of one baseball quad. This project will drastically enhance the overall guest experience and address current safety concerns at this facility by improving playing conditions and the parking areas. This project will also improve functionality and guest experience at the concession stand, office, scorekeeper, and spectator areas. Removal of the trailer at this facility will enhance aesthetics and improve overall operations at this facility.

Project: PRC202006 Title: Ray Wayside Site Improvements
 Department: Parks and Recreation

Project Description

The Ray Wayside Site is a master plan project with improvements and upgrades to include: boat ramp; kayak and canoe launch; new pavilion; additional sidewalks; floating dock; ADA fishing platform; paving; and restroom improvements. The project will be completed in two phases. Phase 1 will include the design, engineering, and permitting of new construction. Phase 2 will include the replacement of existing boat ramps; removal of old dock; installation of a floating ADA accessible dock; building a new hand launch area; removal of old restrooms at ramp; construction of new ADA accessible restrooms; and construction of ADA accessible fishing platform and sidewalks. This project will significantly increase safety for park guests utilizing the boat ramp and dock, improve the functionality of the boat ramp, address ADA accessibility, and enhance the overall guest experience.

Project Detail

Project: PRC202007 Title: Baseline Road Trailhead Improvements
 Department: Parks and Recreation

Project Description

Design and permit the installation of a new playground, fall zone, and shade structures; remove old playground elements, fall zone material, and border to install new play structures, border, fall zone material, and shade structures. The existing playground unit has two distinct units that address a variety of age groups. These units have had several critical failures and the current condition is worsening. This is due to the age, amount of use, and being exposed to the elements. The current safety surfacing is poured in place and has exceeded its expected life, per industry standards and may no longer meet standard F2223, the standard for surfacing. The addition of shade structures of varies sizes located over specific playground components will reduce the temperature and will also increase the life expectancy of the overall unit itself.

Project: PRC202008 Title: Westbrook Park Improvements
 Department: Parks and Recreation

Project Description

Norm Westbrook Park is a resource-based park providing opportunities for equine use and walking trails. This project consists of a multiphase approach over the next 3 years. Phase 1 was completed in FY 2022. Phase 2 will include a playground, pavilion, multi-purpose field, and a park standard restroom. The restroom facility is a new park standard two-hole ADA restroom at the park. The restroom will include a well, septic system, lighting and power, mirrors, paper towel and soap dispensers, grab bars, and ADA sidewalks. Facilities management department involvement will include overseeing the construction of a 350+/- sf restroom facility. The restroom facility will be located near the existing pedestrian parking lot. Architectural and engineering is slated for FY 2024 with an anticipated construction in FY 2025.

Project: PRC202009 Title: Ocala Park Estates Improvements
 Department: Parks and Recreation

Project Description

Ocala Park Estates improvements will consist of the design and construction of a parking lot with 1 ADA and 3-4 regular parking stalls and an ADA sidewalk to allow access to all amenities. Additional improvements include the preservation of natural space with the addition of a non-paved walking trail, installation of a 2-12 year old playground, and construction of a 20 X 20 picnic pavilion with a grill. These improvements will add to the vision of the park and improve the quality of life of the community.

Title: Rainbow River Tuber Exit

Department: Parks and Recreation

Project Description

Rainbow River Tuber Exit project includes the construction of a new river access ramp for egress only, a small restroom, a 1.38-mile road which includes an at-grade railroad crossing and a turn-around loop. Some of the non-construction tasks for this project would include: an upland land lease from FDEP for 126 acres, railroad crossing authorization from CSX, an easement from CSX to build a road through their property west of the railroad, a connection to US41, submerged land lease to build a river access ramp, and all the applicable plan approval and permitting.

Project: PRC202201 Title: Rotary Field Improvements
 Department: Parks and Recreation

Project Description

The Rotary Sportsplex has become one of the Marion County’s most in-demand athletic facilities. As such, the quality of the fields and health of the turf have been put under considerable strain and it has become increasingly difficult to maintain the fields at a premier level. This project will improve the quality of playable areas in the facility as well as the aesthetic people have come to expect from this facility. The recreational leagues that call this park home will benefit from renovated athletic fields. Additionally, improved athletic fields are an incentive for tournaments to bring their business to Marion County. The current upper soccer fields at Rotary will be stripped and the surface grade will be brought up to level. Installation of sports turf will be added to the fields. Along with irrigation improvements, new bleachers and sports lighting.

Project: PRC202202 Title: Reddick Playground
 Department: Parks and Recreation

Project Description

The town of Reddick is an underserved area of Marion County that currently has very limited options for outdoor recreation. The Parks & Recreation department will design and install a new playground to provide much needed recreation space in the community. This project will be designed in-house by the department's design staff. Additional benefits of a new playground installation will include an open space for passive recreation and will provide an open outdoor space for improving physical fitness, overall wellbeing and relieving stress. Park improvements include new playground, bathrooms, walking trail, open space and parking improvements.

Project: PRC202204 Title: Coehadjoe Park Improvements
 Department: Parks and Recreation

Project Description

Cohadjoe Park is one of the most unique resource-based in the County’s park system occupying 91.10 acres (68.20 actual park; 22.5 in easements) in Marion County, just outside of the northeast region of City of Ocala. The park was originally constructed in 1996 and was managed by the City of Ocala Recreation and Parks Department until October, 2006 when management reassigned to the Marion County Parks & Recreation Department. Marion County Parks & Recreation is planning to expand the parking around the loop near the tennis and pickleball courts. Parking improvements include site preparation, grading, paving, and stripping of new directional parking and recoating and stripping of existing directional parking. The project budget is set for \$238,315 with \$50,000 to be dedicated for engineering and \$188,315 for the construction of the parking lot. This project will be constructed in one phase. Design is slated for FY 2027 and construction in FY2028.

Project: PRC202401 Title: Multi-Use Facility And Sportsplex
 Department: Parks and Recreation

Project Description

In the Parks & Recreation Department’s recently approved Operational Plan, the Department proposed an initiative to work cooperatively with the Marion County Tourism Development and the Marion County Sheriff’s Office Emergency Management team on the construction of a multi-purpose venue to address the needs of the community and augment the growing sports tourism sector. This venue will consist of a clear span 98,000 sf building with flexibility in equipment to have 16 volleyball courts, 8 basketball courts, 16 pickleball courts, and 12 mats for martial arts and wrestling. The building will also have space for a fitness center, 2 training rooms, 1 competition cheer/dance studio, 2 competition cheer areas and service amenities such as a health bar/bistro and a full-service bar. When the community has a need for emergency sheltering, the building will have the capacity and features to be transformed into a full-service emergency center. Outside of the building there will be a minimum of 4 outdoor fields with the capacity to host soccer, lacrosse, football and rugby along with one 4-field baseball quad with room to add additional baseball or softball fields. The facility will serve the general community yet will provide much needed recreational space for the southwest area of Marion County. The design and construction of this venue will need be state-of-the-art to meet various sheltering regulations, codes and standards to ensure safety, functionality, and flexibility. Design is slated for FY 2028 and construction in FY 2029.

Project: PRC202501 Title: Sports Field Netting Improvements
 Department: Parks and Recreation

Project Description

The Parks & Recreation Department will be adding sports field safety netting at Belleview Sportsplex, John Van Fleet Park, Ralph Russell Park, Rotary Sportsplex, and Wrigley Fields is a critical enhancement to ensure the safety of athletes and spectators. This project aims to minimize the risk of injuries from stray balls during games and practices, thereby creating a safer environment for all park visitors. By installing high-quality netting, we can significantly reduce liability concerns and enhance the overall experience for patrons, making these parks more attractive venues for community events and sports leagues. The scope of work will include the installation of durable netting systems that are designed to withstand various weather conditions, ensuring long-term effectiveness. This proactive measure aligns with current safety standards and demonstrates our commitment to providing a secure and enjoyable recreational space. The project will not only protect individuals but also foster a sense of security, encouraging increased participation in local sports activities.

Project: RBC000002 Title: MC Employee Health Clinic
 Department: HR-Risk and Benefit Services

Project Description

To build an on-site employee health clinic that would expand the services currently offered to employees, resulting in a greater level of care than what is currently available with our limited space and resources. With the potential to combine with the current occupational clinic, employees would have better access to convenient, high-quality care which would increase productivity, reduce absenteeism, improve retention, and have the potential to prevent and identify illness in earlier stages. Further aspects of the clinic have the potential to include an on-site pharmacy, mental health services, and diagnostic care. Studies have shown not only this increase in employee satisfaction and health but an increase in savings to the County as employees utilize the clinic in place of external services.

Project: SAC000001 Title: JC3 Fourth Floor Expansion Phase 1
 Department: Facilities Management

Project Description

The State Attorney's Office Expansion and Courtrooms project includes the construction of new office space and courtroom on the vacant 4th floor of the Judicial Center. Nearly 25,000 square feet of shelled space is available for construction. The State Attorney's Office has reached its capacity on the fifth floor of the judicial center. The SAO is requesting to expand part of the fourth floor to accommodate their needs. This project will also create a new modern courtroom on the fourth floor that will accommodate a full jury.

Title: Timucuan Road and Lake Weir Culvert Improvements

Department: Office of the County Engineer

Project Description

The Timucuan Road and Lake Weir Culvert Improvements is located on SE Timucuan Rd between the Bird Island and Wallace E Johnson Jr subdivisions. A concrete bridge was originally in place to travel between Bird Island and the Mainland. The bridge was replaced with a causeway and triple culverts for safe travel in 1979. The culverts were replaced and lengthened in 2003. Due to low water levels in lake Weir, the water is no longer flowing through the culverts. As a result, a portion of lake Weir has become isolated from the main lake and the insufficient flow exchange to the area has created unfavorable conditions leading to potential eutrophication. The current design involves installation of new culverts at a lower invert elevation to restore flow exchange between both sides of the causeway.

Project: SMC0002DR Title: Country Gardens Stormwater Retrofit CP 59
 Department: Office of the County Engineer

Project Description

The scope of this retrofit project consists of stabilizing the eroding banks of an existing retention pond, constructing a dry treatment pond, and improving a portion of the surrounding conveyance system. Historically, this area has experienced road and property flooding, the swale network is substandard, and little to no treatment is provided to a retention area that has an existing sinkhole.

Project: SMC0002FL Title: Stanton Weirsdale Drainage Project
 Department: Office of the County Engineer

Project Description

The Stanton Weirsdale Drainage project is located in the Gerald's Survey Subdivision located south of SE HWY 42 and west of SE 134th Avenue Road. This project will be partially funded from a Community Development Block Grant (CDBG) to improve the internal road system to MSTU's Citizen Standards, provide a sidewalk along SE 157th Lane from SE 134th Avenue Road to the school, address water quality and drainage from SE 134th Avenue Road, clarify the right-of-way provided by the Marion County School Board, and address existing drainage issues in the area. The lion's share of the project funding will be from a CDBG grant totaling \$800,000. OCE/Stormwater budget funding will cover the balance of the project's cost which includes: Testing (design), survey, design, ROW/easement acquisition, permitting fees, certifications, construction, testing (construction), and all project completion and closure requirements.

Title: SW 27th Ave Flood Relief

Department: Office of the County Engineer

Project Description

SW 27th Avenue is a county-maintained road located south of Ocala and serves as a major north-south corridor on the south side of the County. The road has historically flooded during significant storm events, such as Hurricanes Frances and Jeanne in 2014 and Hurricane Irma in 2017, and remained impassable for extended periods of time (three weeks for Irma). This project proposes to design and construct a semi-permanent pumping station that can serve to mitigate flooding issues in times of heavy rainfall with the long-term view that the roadway will need more extensive reconstruction in the future to deal with the larger drainage issues.

Title: SW 52nd St Flood Relief HMGP

Department: Office of the County Engineer

Project Description

The County desires to mitigate flooding along SW 52nd Street, just west of Country Road 475, and provide flood relief to not only the road but also surrounding subdivisions during the 100-year storm event. There are no constructed drainage retention areas (DRAs) in the area. During Hurricane Irma SW 52nd Street flooded and remained impassable for several weeks. Anticipated improvements to the Stormwater Management System include new drainage retention areas (DRAs), associated stormwater conveyance infrastructure, and an elevated roadway. The project will provide flood relief for SW 52nd Street, subdivisions: Lemonwood II Phase 7, Deerwood Phase 2 and Luttrell, O.R. Shackelford Land, as well as, S Magnolia Avenue (aka CR 475). The County has secured grant funding from FEMA for the design phase of the project. FEMA grant funding is anticipated for land acquisition and construction, but is not guaranteed at this time.

Title: SSS Units 29 and 30 Innovative Stormwater Retrofit

Department: Office of the County Engineer

Project Description

Silver Springs Shores Units 29 & 30 Innovative Stormwater Retrofit of DRAs 7322 and 7403 CP 80 - This project is located in the Silver Springs Shores Unit 29 & 30 subdivisions. The project will retrofit the bottoms of two drainage retention areas (DRAs 7403 & 7322) with a Bold and Gold (B&G) soil amendment to improve water quality of stormwater runoff prior to reaching the aquifer through infiltration within the DRA. The project is located within the Silver Springs Priority Focus Area. Dry retention ponds provide minimal removal of nitrogen from stormwater runoff as it is being infiltrated. Infiltrated stormwater is a source of nitrogen, in the form of nitrate, to Silver Springs. A Total Maximum Daily Load (TMDL) for nitrate concentration has been adopted for Silver Springs and a basin management action plan (BMAP) has been developed. This project will improve the ability of the existing retention ponds to remove nitrogen from the stormwater entering the pond. This is accomplished by removing approximately two feet of soil from the pond bottoms and replacing it with the Bold and Gold soil amendment. The project will retrofit two DRAs with Bold and Gold soil amendment to improve water quality of stormwater runoff prior to reaching the aquifer through infiltration within the DRA. This water quality retrofit is necessary in order to maintain compliance with the BMAP.

Project: SMC0006FL Title: Country Gardens Flood Relief HMGP
 Department: Office of the County Engineer

Project Description

The County desires to mitigate flooding along SE 34th Place within the Country Gardens subdivision and provide flood relief to the surrounding residences. Country Gardens is a County-maintained subdivision which has historically flooded during years 1998, 2004 (Hurricanes Frances & Jeanne), 2012 (TS Debby), and 2017 (Hurricane Irma). Three homes were directly affected by the flooding. Anticipated improvements to the Stormwater Management System include new drainage retention areas (DRAs), expansion of proposed (previously designed) DRA, associated stormwater conveyance infrastructure, and removal of a portion of roadway for DRA expansion.

Department: Facilities Management

Project Description

Facilities Maintenance will replace the remaining section of 8" iron water main serving the County Jail with new PVC pipe. The current iron pipe is beyond its serviceable lifespan and is beginning to fail. The initial section was replaced 2 years ago.

Project: SOC000027 Title: MCSO Jail E Through F Pods Window Sink
 Department: Facilities Management

Project Description

The jail has had three periods of construction 1983, 1991, and 2006. The second phase of construction is now 30 years old. The POD's are built as dorm style sections with common bathroom areas in each section. The partitions between the wash sinks are constructed of concrete and steel tubing. The steel has become rusted and deteriorated to the point that the tubing has broken off at the top of the concrete. This project is to remove the old mirrors and tubing and replace it with stainless steel material to better withstand the water and other environmental challenges.

Title: MCSO Emergency Management Warehouse

Department: Facilities Management

Project Description

The Marion County Sheriff Office Emergency Management Warehouse project is to allow for the construction of a pre-engineered steel building for storage of Emergency Management equipment. Currently, EOC storage is spread over multiple locations and inside semi trailers. Accessing equipment for emergency deployment is inefficient and slows the response process. Storage, inventory, and maintenance of items and equipment are stretched as well. EOC frequently is looking for new storage space for equipment and response supplies.

Title: MCSO Forest District New Office

Department: Facilities Management

Project Description

After the Sheriff's review of demographics, population growth, and requests for services, it has been determined that a new district office needs to be constructed in the National Forest to better serve the growing community with increased staff. The current office is one of the oldest Sheriff district office's. The layout is inefficient and too small for continued operation. A larger office is needed which will provide a more efficient layout, evidence submission area, and suspect interview room, in order to meet the needs of the expanding community.

Title: MCSO Jail Kitchen and Laundry Building Expansion

Department: Facilities Management

Project Description

Additional capacity requirements are anticipated for the Marion County Jail. When the inmate population is increased, additional food and laundry services would be required to also increase to meet the requirements for the inmates. The current Kitchen/Laundry building could be expanded to serve an inmate population over 3,076, thus allowing capacity to construct future Pods to support the future inmate population. Partner Engineering and Science, Inc provided a feasibility of expansion and a proposed site plan in the 2022 strategic planning study. The anticipated cost to expand the Kitchen/Laundry building is \$4,500,000.

Project: SOC000052 Title: MCSO Hangar Renovation
 Department: Facilities Management

Project Description

The current hangar at the Ocala International Airport was first built in 1981. The current size and layout are insufficient for the maintenance and storage of the aircraft and proper office space for the staff. The remodel and expansion of the current aviation hangar will account for new, larger aircraft and additional crew members. This project will provide a dedicated maintenance and repair space and optimized flight planning and training spaces for crew members. Depending on site limitations, the estimated expansion is around 4,500 sq. ft.

Project: SOC000056 Title: Marion County Jail Expansion
 Department: Facilities Management

Project Description

The Marion County Jail has a design capacity of 1,924 inmates. Following the 2020 property condition analysis and expansion feasibility report by Partner Engineering and Science, this capital improvement aims to expand the inmate capacity. The first new dormitory, POD I, will house approximately 256 inmates in a newly designed 39,000 SF building. The 2020 report depicts expansion west of the existing jail structures. The total build-out opportunity allows for five additional detention structures and increases the total inmate capacity to nearly 3,100. The final determination for the number of detention structures built will be in consultation with stakeholders, the Marion County Board of County Commissioners, and the Marion County Sheriff's Office.

Project Detail**

Project: SOC000057 Title: Jail Chillers and Pumps
 Department: Facilities Management

Project Description

Replacement of two (2) 250-ton chillers and pump units at the Marion County Jail is needed. These chillers serve the Jail's general population, booking, the medical infirmary, H-Pod, G-Pod, the kitchen and the hallways leading from the initial jail into the newest expanded sections. The current units are 19 years old and are exhibiting frequent breakdowns in the condenser fans as well as the sensors. Furthermore, the units are physically rusting through in areas and the coils are showing signs of flaking. There is no redundancy set up on these units and it is imperative that they function at full capacity as they serve both incarcerated citizens as well as the individuals that work at the Marion County Sheriff's Department.

Project: SOC000058

Title: MCSO Solar Panel Heat Exchanger

Department: Facilities Management

Project Description

The current solar water heating system located as the Marion County Jail Complex is currently nonfunctional due to calcium blockages where water is unable to pass through and therefore gets trapped and creates leaks in the system. It is recommended to replace this current system with a closed loop system which loops glycol into the system, keeping contamination out of the panel and heat exchanger. This system serves many pods of the jail with heated water which could save significant amounts in utility bills when in proper use.

Project: SOC000059 Title: Sheriff's Operations Center Reroof
 Department: Facilities Management

Project Description

The current roof on the Sheriff Operations Center is over 20 years old and the warranty has since expired in 2021. Various areas of the roof have begun to experience leaks, and several patches have been performed by contractors over the last three (3) years. These leaks have caused damage to the internal insulation, decking and poses further threat of penetration to the interior of the building, as well as mold and mildew build up. With the building serving as the primary operating facility for Marion County Sheriff personnel, and the lobby area being open to the public for inquiries and various functions such as fingerprinting, it is imperative to replace the roof to keep the structure intact and staff and visitors safe.

Project: STC073800 Title: CR 314 Resurfacing Infrastructure Surtax
 Department: Office of the County Engineer

Project Description

This rehab project is located on NE Hwy 314, which is a two-lane collector road located in Salt Springs, FL. The project is approximately 2.7 miles in length, and begins at the intersection with NE 127th St Rd and ends at the three-way intersection with N Hwy 19. This rehab project will include overlaying the existing pavement, replacing cross drains and end treatments, reconstructing driveway aprons where needed, sodding shoulders and restriping pavement markings. The construction of this project will take approximately four months to complete.

Project: STC073801 Title: NW 49th and 35th St Ph 2B Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is located on NW 49th/35th Street from NE 35th Street to the north end of limerock pit in Ocala. The project is approximately 1.5 miles in length, and will a new, 4-lane divided roadway. The four-lane road design is anticipated to include a four-lane roadway with 12' lanes, a grassed median, 4' bicycle lanes on each side of the roadway, curb and gutter, required drainage retention areas and a 5' wide sidewalk on each side of the roadway with appropriate Americans with Disabilities Act markings and slope according to the Federal Guidelines. The existing 90 linear foot underpass under CR 484 for the multi-use trail was designed and constructed to accommodate this widening project; therefore, no underpass design considerations are expected. The design of this project will take approximately 12 months to complete, with the construction taking 24 months to complete.

Project: STC073804 Title: SW 49th and 40th Ave Ph 1 Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is a new four-lane divided roadway project, and will encompass SW 40th Ave located in Ocala. Currently, SW 40th Ave is a 0.5 mile long, two-lane minor local roadway. The current road score, known as the PCI rating, on the existing road is considered to be in fair condition. The project is approximately 1.7 miles in length. It is starting at the SW 49th Ave/SW 66th St intersection and ending at the SW 40th Ave/SW 42nd St intersection. This capacity project will include right-of-way acquisition, constructing a four-lane, curbed asphalt roadway with medians, adding stormwater conveyance systems and DRA's, reconstructing/adding driveway aprons, and providing appropriate striping and pavement markings. The design of this project has been ongoing, and will be complete in Spring 2025. Construction will take approximately twelve months to complete.

Project: STC073811 Title: NW 49th and 35th St Ph 3B Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is located on NW 49th/35th Street from NW Hwy 225A to NW 44th Avenue in Ocala. The project is approximately 3.4 miles in length. The project will include widening NW 49th/35th Street from two lanes to four lanes for the first half mile starting from NW 44th Avenue and for the remaining length of the project constructing a new four-lane divided roadway ending at NW Hwy 225A (NW 70th Avenue). Improvements will also include the addition of a drainage system to accommodate capacity and the relocation and interconnecting of the water and sewer utilities within the project limits. Additionally, a new traffic signal will be installed on NW 49th St at NW Hwy 225A. The design of this project will take approximately 6 months to complete, with the construction taking 14-16 months to complete.

Project Description

This capacity project is located on NW 80th/70th Ave from W Hwy 40 to N US Hwy 27, which is a collector roadway in Ocala. The project is approximately 3.76 miles in length, and will include adding two lanes to NW 80th/70th Ave. The road design is anticipated to include a four-lane roadway with 12' lanes, 4' bicycle lanes, a 12' multi-use path, 5' wide sidewalk, a grassed median, required drainage retention. The County is currently acquiring right-of-way for the project. The design will take approximately 4 months to complete, and construction will likely take 18 months to complete.

Project: STC073813 Title: SW 49th Ave S Seg F Infrastructure Surtax
 Department: Office of the County Engineer

Project Description

This capacity project is located on SW 49th Avenue, which is a two-lane collector roadway located in Ocala. It is a feeder road to SW Hwy 484 and various other routes along this roadway. The project is approximately 1.6 miles in length, begins at Marion Oaks Manor, and ends 0.7 miles south of SW Hwy 484. The project will include widening the existing roadway to create four additional lanes with 4-foot paved shoulders in each direction, a 22-foot-wide grassed median, a 5-foot sidewalk on the west side of roadway, with a 10-foot grassed utility strip. A 12-foot shared use path will be provided on the east side of the roadway. Improvements will also include installing a new drainage system, reconstructing driveway aprons, sodding shoulders along with new striping, and pavement markings. The design of this project will take approximately fourteen months to complete, with the construction taking twelve months to complete.

Title: SW 49th Ave North Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is located on SW 49th Avenue, which is a two-lane collector roadway located in Ocala. It is a feeder road to SW Hwy 484 and SW College Rd. The project is approximately 3.4 miles in length, begins at Marion Oaks Trail, and ends at the intersection of SW 95th Street. The project will consist of widening the existing roadway to create four additional lanes with landscaped medians, adding roundabouts with street lighting at SW 115th Street Road, SW 103rd Street Road, and SW 100th Street intersections. It will include lengthening the existing pedestrian tunnel, adding a new pedestrian tunnel approximately 600' north of the existing tunnel, adding signals and pedestrian cross walks at each intersection with street lighting, landscape design, overlaying the entire route with asphalt, replacing cross drains and end treatments, reconstructing driveway aprons, sodding shoulders and restriping pavement markings. The design of this project will take approximately fourteen months to complete, with the construction taking twelve months to complete.

Title: SW 105th Ave and 105th St Resurfacing
Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This rehab project is located on SW 105th Street/105th Street, which is a two-lane collector road located in Ocala, FL. The project is approximately 2.1 miles in length, and begins at the intersection of SW 105th Ave with SW 110th Street and ends at the three-way intersection of SW 105th Street with SW Hwy 200. This rehab project will include overlaying the existing pavement, replacing cross drains and end treatments, reconstructing driveway aprons where needed, sodding shoulders and restriping pavement markings. The construction of this project will take approximately two months to complete.

Project: STC073831 Title: Pavement Preservation
 Department: Office of the County Engineer

Project Description

This project creates a fund for miscellaneous pavement preservation projects. These projects could include chip-seal, fog seal, cape seal, crack seal, micro surfacing, asphalt sealant, rejuvenator, overlays, etc. These activities are meant to improve roadway flexibility, durability, and promote longevity of overall roadway performance. This is an annual reoccurring project.

Project: STC073834 Title: Bridge 364012 and 364150 Repairs
 Department: Office of the County Engineer

Project Description

This project is to make repairs to two existing bridges: a bridge on CR 315 over Daisy Creek (#364012) and a bridge on NE 145th Avenue Road over a canal in the Ocala National Forest (#364150). The CR 315 bridge is a series of three concrete box culverts constructed in 1958 to span Daisy Creek. The project will include repairing wingwalls, realigning the channel, and installing bank and scour protection. CR 315 is a two-lane collector road that is in fair condition in this area. The NE 145th Avenue Road bridge consists of two corrugated metal arches constructed in 1940. A cost benefit analysis is being performed for this bridge to compare the cost of a complete replacement of the bridge vs. the cost of repairing the existing structure. The design of this project will take approximately six months to complete, with the construction taking twelve months to complete.

Title: NE HWY 314 Resurfacing Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This rehab project is located on NE Hwy 314, which is a two-lane collector road located in Fort McCoy, FL. The project is approximately 4.8 miles in length, and it begins at a three-way intersection starting at NE 170th Avenue and ends at the intersection of NE 127th St Rd. This rehab project will include overlaying the existing pavement, replacing cross drains and end treatments, reconstructing driveway aprons where needed, sodding shoulders and restriping pavement markings. The design of this project will take approximately five months to complete, with construction taking approximately eight months to complete. The design of this project will be funded through the Gas Tax and construction is funded by the Infrastructure Sales Tax.

Project: STC073852 Title: North and West HWY 329 Resurfacing Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This rehab project is located on N and W Hwy 329, which is a two-lane collector road located in Citra. The project is approximately 4.7 miles in length, and it begins at the intersection of W Hwy 318 and N Hwy 329 and ends at the intersection of W Hwy 329 and NW Gainesville Rd. N/W Hwy 329 is feeder road to many other roadways along the route. This rehab project will include overlaying the existing pavement, replacing cross drains and end treatments, reconstructing driveway aprons where needed, sodding shoulders and restriping pavement markings. The design of this project will take approximately six months to complete, with construction taking approximately seven months to complete.

Project: STC073854 Title: SE Maricamp Rd at Baseline Rd
Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This new interchange project is located on SE Maricamp Road, which is a four-lane arterial roadway located in Ocala. SE Maricamp Road is a feeder road to many various roadways along the route. This project is intersecting with Baseline Road (SE 58th Avenue), which is an arterial roadway. The new interchange project will include a bridge to separate the two roadways, along with ramps to enter and exit each roadway, installation of signals, overlaying the existing roadway, replacing cross drains and end treatments, reconstructing driveway aprons, sodding shoulders and restriping pavement markings. The design of this project will take approximately twenty-four months to complete, with the construction taking eighteen months to complete.

Project: STC073865 Title: Emerald Road Extension Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is located on Emerald Road from SE 92nd Loop, which is an arterial roadway in Ocala, to the Florida Northern Railroad Crossing. The project is needed to help alleviate traffic congestion on SE Maricamp Rd and for Emerald Road to act as a secondary access route to the southern portion of Marion County via SE 92nd Loop. Emerald Road Extension is a proposed +/-2.4-mile, two-lane, undivided, rural collector roadway connecting SE Maricamp Road and SE 92nd Loop. Marion County has identified a need for the Emerald Road Extension through the long-range transportation planning process to support future traffic in Southeast Marion County due to development growth in the Silver Springs Shores area. Future traffic projections have been developed as part of this PER for the 2040 design year, consistent with the most recent Long-Range Transportation Plan (LRTP). The projected 2040 design year traffic volume within the project is between 6,000 and 7,000 average annual daily traffic (AADT), which supports the two-lane rural collector roadway design section proposed. The roadway section includes 12-foot travel lanes, a paved 4-foot bike lane in each direction, and 5'-wide concrete sidewalks on either side of the proposed roadway. It will also include installation of a new traffic signal on SE 92nd Loop at Emerald Rd. The right-of-way needed to accommodate the typical section is 120-feet wide (per Marion County land development code). The design speed of the new roadway section is intended to be 45 miles per hour. The design of this project is nearly complete and construction will take approximately 14 months to complete.

Title: SW 27th Ave at SW 66th St Roundabout
 Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This is a double lane roundabout project located at the intersection of SW 27th Avenue and SW 66th Street, in Ocala. This roundabout is on a two-lane collector roadway, intersecting with another two-lane collector roadway. SW 27th Avenue is a feeder road to SW 42nd Street, and SW 66th St is a feeder road to SW College Road. This project will include right-of-way acquisition, removal of existing signal, new intersection lighting, installing new curb and gutter, overlaying the existing roadway, replacing cross drains and end treatments, reconstructing driveway aprons, sodding shoulders and restriping pavement markings. The design of this project will take approximately twelve months to complete, with the construction taking twelve months to complete.

Title: Marion Oaks Manor Extension Ph 1
 Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is located on Marion Oaks Manor from SW 49th Avenue, which is a major local roadway in Ocala, to S Highway 475. The widening and extension of Marion Oaks Manor has been identified as a need to support planned development growth and regional traffic patterns within this area of Marion County. The project is approximately 5.45 miles in length, and will consist of adding two lanes with an I-75 flyover. A Project Development and Environment (PD&E) study to evaluate multiple alternatives for the widening of Marion Oaks Manor from two lanes to four lanes and the extension of Marion Oaks Manor via an overpass over I-75 is in progress and will take one year. Project design is expected to take 18 months and construction will likely take 24-30 months.

Title: N Magnolia Ave Resurfacing Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This rehab project is located on N Magnolia Ave which is a two-lane major local road located in Citra, FL. The project is approximately two miles in length, and it begins at a three-way intersection at the three-way intersection with E Hwy 329 to the three-way intersection with E Hwy 316. This rehab project will include overlaying the existing pavement, replacing cross drains and end treatments, reconstructing driveway aprons where needed, sodding shoulders and restriping pavement markings. Construction will take approximately four months to complete.

Project: STC073892 Title: SE 147th PI Resurfacing Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This full depth reclamation project is located on SE 147th Place, which is a two-lane collector roadway located in Summerfield. It is a feeder road to S US Hwy 301 and S US Hwy 441. The project is approximately 2.1 miles in length, and it is starting at S US HWY 301, and ending at the intersection of S US Hwy 441. This reclamation project will include reconstructing the base of the roadway, compacting it, and then adding additional layers of structural and friction course asphalt on top, replacing cross drains and end treatments, reconstructing driveway aprons, sodding shoulders and restriping pavement markings. The design of this project will take approximately three months to complete, with the construction taking four to five months to complete.

Project: STC073894 Title: NW and NE 35th St Ph 1B Infrastructure Surtax

Department: Office of the County Engineer

Project Description

This capacity project is located on NW/NE 35th Street from 600 feet east of W Anthony Road to NE Jacksonville Road. The project is approximately 0.9 mile in length, and will include adding two lanes to NW/NE 35th Street. This project consists of widening the existing 2-lane street into a 4-lane divided urban street, with associated improvements including, but not limited to, curb and gutter, concrete sidewalks, medians, storm drainage, drainage retention areas, traffic markings and signals, fences, ditches, berms, relocation of existing utilities, modifications to private improvements, driveways, sewer and water mains. In addition, the signal on NE 35th St at NE Jacksonville Rd will be rebuilt. The design of this project will take approximately 6 months to complete and right-of-way needs to be acquired. Construction will take 18-24 months to complete.

Project: STC073897 Title: CR 484 Widening Ph 1 Infrastructure Surtax
 Department: Office of the County Engineer

Project Description

The CR 484 Widening project will be a multi-phase project that widens the road from SR 200 in the west to CR 475 in the East. Phase 1 of the project will add 2 lanes from Marion Oaks Blvd to CR 475A, a distance of 1.8 miles. This project will bring much needed capacity, as development along CR 484 continues to stress the existing infrastructure. This capacity project is located on SW Hwy 484 from Marion Oaks Boulevard to SW 16th Avenue, which is an arterial roadway in Ocala. The project is approximately 1.8 miles in length, and will include adding two lanes to SW Hwy 484. This is one component of an overarching project to widen the existing SW Hwy 484 two-lane road to four lanes, from the end of the existing four-lane section east of Marion Oaks Pass to the beginning of the four-lane section east of SW Hwy 200. The four-lane road design is anticipated to include a four-lane roadway with 12' lanes, a grassed median, 4' bicycle lanes on each side of the roadway, curb and gutter, required drainage retention areas and a 5' wide sidewalk on each side of the roadway with appropriate Americans with Disabilities Act markings and slope according to the Federal Guidelines. The existing 90 linear foot underpass under CR 484 for the multi-use trail was designed and constructed to accommodate this widening project; therefore, no underpass design considerations are expected. In addition, the five signals at Marion Oaks Blvd, SW 20th Ave Rd, I-75 Southbound Ramps, I-75 Northbound Ramps, and SW 16th Ave will be rebuilt. The design of this project will take approximately 12 months to complete, with the construction taking 24 months to complete.

Project: STC073898 Title: Signal Connectivity Upgrades
 Department: Office of the County Engineer

Project Description

This project will be a multi-year effort to upgrade the County's traffic signal connectivity. High-speed fiber optic connections will be installed throughout the County. Work will consist of installation of new underground fiber, conduit, pull boxes, new fiber boxes inside traffic signal cabinets, new ethernet switches, fiber route markers, mobilization, and maintenance of traffic. This technology improvement will allow for real time monitoring and adjustment of traffic flow.

Title: Newton Groundwater Mitigation

Project Description

The Newton Landfill has had historical groundwater impacts. An engineering firm currently monitors and tests the groundwater quality at this site. Recent lab results have indicated a potential need to expand the counties potable water system to areas adjacent to the Newton Landfill in the coming years. It is also recommended that additional monitoring wells be added to better delineate groundwater activities in the area.

Project Detail

Project: SWC000048
 Department: Solid Waste

Title: Recycle Center Improvements

Project Description

Recycling centers in Marion County will receive upgrades including high compaction equipment, new concrete pads and bunkers, and electrical infrastructure improvements. These electrical upgrades involve new service, disconnects, breakers, and wiring to meet the demands of the new equipment and code requirements. Backup generators will be installed at select locations to ensure continuous operation during power outages. These enhancements will provide improved service to Marion County residents.

Title: Phase 1 and 2 Engineering Expansion

Project Description

Comprehensive engineering services required to prepare the existing Baseline Landfill site for a planned expansion, implemented in two distinct phases with specific objectives for each. Phase 1 will focus on maximizing the operational efficiency and airspace utilization of the existing "Urban" and "C" landfill cells at the Baseline Landfill. Phase 2 will focus on the engineering activities required for the development of new landfill cells to provide additional waste disposal capacity. The overall project aims to ensure a safe, environmentally sound, and regulatory compliant landfill expansion, ultimately increasing the facility's lifespan.

Project: SWC000051 Title: New Relocation Scalehouse
 Department: Solid Waste

Project Description

Relocation of the existing scalehouse, currently situated within the area designated for future landfill expansion, to a new location outside the expansion footprint. In addition to relocating the scalehouse, the project will also add additional scales. This will improve operational efficiency by allowing for simultaneous weighing of multiple vehicles, reducing wait times for customers and streamlining the landfill's intake process. This relocation and expansion of weighing capabilities will significantly enhance the landfill's operational efficiency and customer satisfaction.

Title: Site Preparation For Expansion

Project Description

The expansion of the Baseline Landfill, will necessitate significant site preparation, primarily involving mass grading to ensure appropriate elevation and drainage. To optimize operational flow and transportation logistics, the project includes the design and construction of a new railroad crossing. Furthermore, in consideration of community visual appeal, a substantial landscaped buffer, incorporating trees and shrubs, will be created along Baseline Road to effectively screen landfill operations and enhance the aesthetic quality of the adjacent corridor. These integrated improvements aim to balance operational, environmental and community needs.

Title: Leachate System Upgrades

Project Description

Construction of a new leachate storage facility and pretreatment/conditioning system to accommodate the increased leachate volumes anticipated following cell construction. The new storage facility will provide adequate capacity to safely and efficiently manage the expanded leachate flow. This construction will ensure that the leachate meets all regulatory requirements prior to discharge or further treatment. This system may include processes such as filtration, chemical treatment, or other appropriate technologies to remove contaminants and optimize leachate quality.

Title: Baseline Infrastructure Relocation

Project Description

In order to begin Phase 2 of expanding the Baseline Landfill, existing infrastructure needs to be relocated to an alternate site. This is necessary to clear the area for the construction of a new landfill cell. Infrastructure relocation will include the gas and leachate systems, as well as the administration building, recycling center, household hazardous waste facility, and maintenance facilities. This comprehensive relocation effort is a prerequisite for the development of the new landfill cell in Phase 2. It ensures that essential services and environmental safeguards remain in place throughout the expansion process.

Title: Phase 1 Construction

Project Description

Phase 1 Construction will focus on construction activities to maximize the efficiency and airspace of the existing "Urban" and "C" landfill cells at the Baseline Landfill. Construction will involve re-grading slopes for stability and compaction, and potentially upgrading leachate and landfill gas collection systems within these cells. The project may also include building operational enhancements to optimize waste placement. All work will adhere to approved engineering designs and environmental regulations to improve the utilization of the current landfill capacity.

Project: UTC000051 Title: Utilities Administration Elevator Replacement

Department: Utilities Management

Project Description

For the past few years, the elevator in the Utilities Administration Building has been problematic. It has been out of service occasionally due to requiring a number of repairs, which are not evident during the monthly inspections. This is a potential safety issue should the elevator fail while occupied. This project will replace the elevator in the Utilities Administration Building.

Project: UTC000052 Title: Replacement Sign for Utilities
 Department: Utilities Management

Project Description

To replace the large sign by the entrance to the Utilities parking lot. The current sign is old and falling apart. We plan to dismantle the current sign and replace it with a digital sign that will not only be used to identify the Utilities office but also to duplicate billboards for advertising and messaging about water conservation, springs conservation, etc. The goal is to allow the Public Information Office to also utilize messaging ability.

Project: UTC000053 Title: Utilities PLC Replacements
 Department: Utilities Management

Project Description

The Programmable Logic Controllers (PLC) control the operations of the wastewater plants. Currently, the PLC units are obsolete as they were installed when the plants were built. Just as with other technology, these PLC's have reached their life expectancy and tend to lose support. In addition to maintaining the current level of support, these are required to keep the plant operational. These units need to be replaced in order for Marion County Utilities to continue to provide the level of service necessary for the citizens serviced by them. This project will replace the PLC units at Oak Run and Stonecrest wastewater treatment plants and ensure this service level is reached.

Project Detail

Project: UTC000081 Title: Cedar Hills Water Main Replacement
 Department: Utilities Management

Project Description

Marion County purchased Marion Utilities in June of 2021. Cedar Hills is one of the subdivisions formerly serviced by Marion Utilities, but the infrastructure is old and needs to be replaced. This project will allow Marion County to upgrade the water delivery service in this subdivision, making it more efficient.

Project: UTC000083 Title: Full Rehabilitation of CDH-002
 Department: Utilities Management

Project Description

The Cedar Hills Lift Station CDH-002 has minimal access and was poorly maintained prior to being purchased from Marion Utilities in June of 2021. This project would remove the existing Marolf structure and converting it to a King Manhole. Additional work includes a new 6" wet well and above ground check valve array, pumps and control panel with integrated SCADA telemetry. This will help to ensure flows from the Cedar Hills subdivision, as well as ensuring the unit is built to Marion County standards.

Project: UTC000084 Title: Lift Station and Sewer Main Rehab
 Department: Utilities Management

Project Description

Every year, some lift stations and sewer mains need rehabilitation. These rehabilitation projects include Lift Stations, Sewer Mains, Inflow and Infiltration, Pigging services, Lightning protection, and emergency repairs. This project is to set up available funding each year to cover these costs to ensure the efficiency and availability of wastewater services in Marion County.

Project: UTC000085 Title: Shores Offsite EQ Decommissioning
 Department: Utilities Management

Project Description

During an assessment of the viability of several wastewater transmission systems within the Silver Springs Shores utility system. In order to maintain steady state conditions, it has been determined the best course of action is to decommission the EQ Basin Offsite transmission system. This will allow for better flows within the entire system.

Project: UTC000089 Title: Road Runner Resources Piping
 Department: Utilities Management

Project Description

The Water and Wastewater System Utility Agreement with 484 Road Runner Resources, LLC will provide water and sewer to the developer's property and 15 benefitting parcels along the route through Marion Oaks. The Developer shall design, engineer, permit, and construct the off-site Improvements to include an eight-inch (8) water main, an eight-inch (8) wastewater collection (gravity) main, associated manholes, services, and related components to provide both water and wastewater service for the Project (the "Utility Improvement"); extending from the on-site system at the intersection of SW 61st Circle and south to SW 137th Street where the water and wastewater mains will turn east; the eight-inch (8) wastewater gravity main will continue to the proposed Project lift station. The County shall reimburse Developer for the cost to extend the water and wastewater mains, a portion of the lift station (oversize) and any related costs to support the off-site Improvements.

Project: UTC000096 Title: Majestic Oaks Storage and Pumps
 Department: Utilities Management

Project Description

Marion County Utilities (MCU) has identified that the current flow from the Majestic Oaks Water Treatment Plant (MOWTP) is not what it will need to be in order to support the growth of services in the area. To improve the availability and flow in this area, MCU will construct a ground storage tank and high service pump bank to increase output from the MOWTP. The MOWTP currently uses the well pumps to distribute potable water to customers and support fire flows and does not include significant storage. In its current configuration, output from the MOWTP is limited to the capacity of the existing wells. By adding storage and a high service pump bank, the MOWTP will be able to deliver water at a higher rate and volume than currently possible using the wells alone.

Project: UTC000097 Title: Water System Storage Improvements
 Department: Utilities Management

Project Description

Marion County Utilities (MCU) has identified potential capacity shortages in water service. In order to determine how to alleviate these future needs, MCU will perform a master planning study to evaluate plant capacities and water storage improvements to benefit the West Side Consolidated and East Side Consolidated public water systems. Continued growth in the area. Additionally, with septic to sewer conversions in Silver Springs Shores and water main extensions in Marion Oaks, there are likely to be significant new customers being connected in the short term. Using the results of the master plan and the recommendations, improvements will be implemented.

Project: UTC000098 Title: Silver Springs Shores Odor Control
 Department: Utilities Management

Project Description

The Silver Springs Shores Wastewater Treatment Facility (WWTF) underwent a major modification in 2021, expanding the operation to meet the needs of the growth in the Southeast portion of Marion County. As this WWTF treats more wastewater, the potential for odor increases. Odors from this WWTF have an adverse affect on the residents in the neighborhood. This project is being undertaken to reduce this risk of odor as much as possible, in the hopes of eliminating the possibility.

Project: UTC000101 Title: SW Wastewater Treatment Plant
 Department: Utilities Management

Project Description

The current facilities in Marion Oaks and Oak Run are approaching capacity. Due to growth in the Southwest portion of the County, there may be a need to expand the current one or more wastewater treatment plants or construct a new one. This project is to allow for analysis of the current plants to determine their ability to handle the projected growth. Should the analysis determine that a new plant needs to be built, this project will allow for the design and construction of this plant.

Project: UTC000103 Title: HiCliff and FtKing Forest Interconnect
 Department: Utilities Management

Project Description

To improve customer service and decrease minor repair costs, there is a need to interconnect Hi-Cliff and Ft. King Forest water systems with the East Side Consolidated Water System. This will require replacing the current 2" and 2.5" water lines with 4" and 8" water lines. Valves will also be replaced, and fire hydrants will be added to provide 500' of overlap coverage along the 8' mains. Total replacement will be approximately 12,000 linear feet of 4" water mains, and approximately 5,440 linear feet of 8" water mains. These lines have required repairs approximately once every other month since July of 2021.

Project: UTC000104 Title: CR 484 Wastewater Repump Station
 Department: Utilities Management

Project Description

Marion County Utilities has identified that the current 12 inch force main is not sufficient to maintain flows. Development in Marion Oaks, specifically from the McGinley property is expected to add pressures of flow which could exceed the pipe strength rating. To alleviate the pressures expected, MCU will construct a repump station. This construction will split the pressure to the Oak Run Wastewater Treatment Plant (WWTP).

Project: UTC000114 Title: Relocations of Water and Sewer Line
 Department: Utilities Management

Project Description

To conduct required design changes necessitated by DOT roadway improvements for relocating water and sewer lines. The project utilizes transmission components or utility capital charge fees. The project also includes relocations of water and sewer lines due to other non-DOT reasons, such as when the Office of the County Engineer redesigns a road requiring utility infrastructure to be moved. This project will ensure funds are available for these required projects.

Project: UTC000120 Title: Automated Meter Replacement
 Department: Utilities Management

Project Description

Automated Meter Reading (AMR) meters are mechanical and will wear out with age. AWWA recommends that AMR meters be replaced every 5 years. This project will assess county meters to determine which automated meters need to be replaced with new equipment. Annually, replace at least 10% of meters 5 years or older as recommended by AWWA. We will replace meters less than 5 years old if the assessment indicates the meter is not going to last the full 5 years. Replacements are to be made as long as funding is available in a given year.

Project: UTC000144 Title: Toilet Rebate Minor Capital Replacement
 Department: Utilities Management

Project Description

Marion County Utility to utilize funds available through grants via the SJRWMD to replace toilets throughout the county. The project allows for small scale water conservation efforts through these purchases. The project will offset the withdrawal of groundwater and delay the need for alternative sources of water.

Project: UTC000152 Title: Irish Acres and Kunal Interconnect
 Department: Utilities Management

Project Description

Marion County has identified the need to connect water lines between Irish Acres subdivision and Kunal. This is a strategic move to connect the SR 441 and SR 326 area, which will eventually allow the County to interconnect all services. This long term project will ensure citizens have access to water services, and more easily allow Marion County to switch routes in the case of power outages or other damages to infrastructure.

Project: UTC000205 Title: Lowell Water Supply
 Department: Utilities Management

Project Description

Due to soil contamination identified in the Lowell area in Northern Marion County, the Florida Department of Environmental Protection (FDEP) identified this area as having soil contamination levels above the Department's professional target clean up levels. FDEP requested that Marion County Utilities (MCU) begin the process of connecting the residents and businesses in this area to the MCU water supply. To facilitate this, FDEP has awarded a grant to begin this process

Title: US 301 Track and Card to CR 42

Department: Utilities Management

Project Description

The Track and Card Water Treatment Plant currently operates independently to serve localized development to the plant. The availability to serve is limited to the plant's capacity and reliability is limited to the existing plant equipment. Interconnecting the plant with the regional water system will allow the County to increase available capacity, reliability and allow for the Track and Card plant's capacity to be incorporated into the County's larger water system. This project is for the design and construction of a water main along US 301 and SE 177th Place to interconnect the Track and Card Water Treatment Plant with the East Side Consolidated water system.

Project: UTC000233 Title: Wells at Marion Oaks 4 and Summerglen
 Department: Utilities Management

Project Description

The Marion Oaks Number 4 and Summerglen Water Treatment Plants were constructed with two production wells at each plant site. However, each plant is currently operating one well each due to issues that have deemed the other well inoperable. Due to current demand within the surrounding area, there is need to replace these inoperable wells to supply capacity and fire flow requirements for the surrounding area. This project is for the design and construction of new wells - one each at the Marion Oaks Number 4 and Summerglen Water Treatment Plants.

Project: UTC000235 Title: Wells for Single Well Systems
 Department: Utilities Management

Project Description

Currently, MCU has four water treatment plants (Sheri Oaks, McAteer Acres, Libra Oaks, & Oak Creek Cavern) operating with one well each to support the supply needs of each development. A failure of the well at any of these plants results in MCU being unable to provide service to the residents. This project is for the design and construction of a second well at the four plants mentioned above. Redundant wells are necessary at each plant to have continuity in service in the event a well goes out of service.

Title: Reject Pond at SSS Wastewater Treatment Plant

Department: Utilities Management

Project Description

The Silver Springs Shores Wastewater Treatment Facility is an operational wastewater treatment plant which treats approximately 2 million gallons a day of wastewater. The plant is currently operating without a reject pond which is used in the event there is a plant upset allowing staff the ability to send effluent water for storage until adjustments are made and the rejected effluent sent back for retreatment. The project is for the design and construction of a reject pond for the Silver Spring Shores Wastewater Treatment Facility. The reject pond will be used in the event there is an upset at the plant, which will allow the plant to stay in compliance while the necessary adjustments are implemented to get the plant back in compliance.

Project: UTCEXT001 Title: Water Line Extension Grant Program
 Department: Utilities Management

Project Description

To better serve unincorporated Marion County with Potable Water Service, Marion County proposes to develop a program that would provide a mechanism for potential customers, who meet defined criteria outlined in the program, the ability to submit applications for shared costs associated with water line extensions. Additionally, the extensions could provide central water service to benefitting lots along the pipeline area, supporting more controlled use of the groundwater by a central water source. These short water line extensions would generally consist of, but not be limited to, designing the water line extensions, designing future stub-outs that support the future extensions outside the established boundary of the individual project, installing the required water system infrastructure and connecting the existing system(s), installing fire hydrants to provide fire flow within the area(s), permitting, utility coordination, roadway reconstruction and restoration.

Project Detail

Project: UTCEXT002 Title: Marion Oaks Water Line Extensions
 Department: Utilities Management

Project Description

To better service an area with higher density in the southwest portion of Marion County in a development that offers a legacy of incomplete water infrastructure, Marion County proposes to complete the required interconnects by extending the water mains in the area. These should provide increased hydraulics and will improve the fire flow in the area. Additional scope will analyze the existing water system, design for fire flow, identifying needed water interconnects, designing the interconnects, designing the future stub-outs that support the future extensions outside the established boundary, installing the required water system infrastructure within the boundary and connecting to the existing systems, permitting, utility coordination, roadway reconstruction and restoration.

Project: UTCEXT003 Title: SW 60th Ave Water Sewer Extension
 Department: Utilities Management

Project Description

To extend both central water and wastewater service to the facility located at 5664 SW 60th Avenue, Ocala, FLA (The Centers). The project will include a lift station that will service The Centers and the region, a new force main which will connect to the County's existing collection system in and around the State Road 200 corridor, the decommissioning and demolishing of existing private wastewater and water treatment plants, connections of existing water and wastewater systems to the new systems, and other services required to service The Centers. The project will also include, but not be limited to, hydraulic modeling of the water and wastewater systems for the new connections, designing for fire flow, and available capacity in the region, size future and existing water interconnects, lift station design and locations, and determination of needed easements or land acquisitions.

Project Detail

Project: UTCEXT004 Title: SSS Water Sewer Extensions Master
 Department: Utilities Management

Project Description

The SSS Water Sewer Extension Master Project consists of four phases, each of which will be composed of 400-500 lots and will require the design and construction of a sewer collection system and water transmission system to serve the lots within the phased project area. This will include all aspects of the associated sewer and water system expansions including, but not limited to, connection to the existing systems, hydraulic modeling, system sizing, permitting, lift station location determination/confirmation, septic tank abandonment, plumbing to connect water and wastewater, subsurface utility engineering, soil boring exploration, survey easement identification, paid capacity fees, pipe infrastructure, manholes, valves, fire hydrants, water and wastewater service assemblies, and restoration.

Project: VCC000001 Title: Gateway Signage 42nd St Flyover
 Department: Visitors and Convention Bureau

Project Description

Gateway Signage located at the 42nd Street Flyover (facing northbound traffic) over Interstate 75. This project is being executed within the confines of the Florida Department of Transportation Community Aesthetic Feature (CAF) Program. The purpose of this signage is to create a sense of place for visitor arrivals and to meet previously unmet tourism needs related to welcoming traffic to exit into Marion County from the Interstate 75 corridor.

Project: VCC000005 Title: Visitor Center Signage
 Department: Visitors and Convention Bureau

Project Description

The Visitors Center is located in downtown Ocala, adjacent to several other government buildings. A monument sign and new affixed building signage will be designed in accordance with brand standards and will further differentiate the Visitors Center and the welcome stop for tourists to Marion County.
